A. E. S. Hears Noted Explorer and Flyer Speak on Labrador

Dr. E. H. Colley tells many interesting experiences during his work in Labrador. Tales of sudden fog which cut off mapping over rugged country were as thrilling as the story of an accident in which the hull of his ship was damaged by another airplane. Keeping his ship on the even keel by manipulating the throttle, Mr. Colley was able to bring it safely to land.

A business meeting of the Society was held later, presided over by President J. C. French '28. Plans of the new glider were discussed and the progress of the work outlined. It was hoped that anyone interested in helping complete the glider or of learning something about this newest form of aviation should come to the Aerodynamic Laboratory, Saturday afternoon.

"I’d hate to be called an Outdoor Girl!"

"That' usually means a girl's a total loss
in a tete-a-tete . . . and takes up 'nature' as a last resort! But I must confess a liking for hills and forest trees . . .
and all genuine natural things.

"I like the simple sincerity of Chesterfield's advertising. Have you noticed it? There’s no extravagance in the claims. Just everyday facts about the fine tobaccos they select and the painstaking way they develop it. They burn evenly, too. Either they're rolled more carefully . . . or the paper's better. I feel the greatest confidence in Chesterfields. They satisfy me!"

"CHESTERFIELD CIGARETTES

THy R.EIIDER • THEY'RE P URE • THEY TASTE BETT ER • They satisfy.

Listen in — Hear Chesterfield's Radio Program. Nat Shilkret and his brilliant orchestra. Every night, except Sunday. . . Columbia Broadcasting System . . . 10:30 E.S.T. Music that satisfies!"
