C A L E N D A R

Tuesday, March 29
11:30 a.m. — Dr. Francis S. Dulleaugh, Jr., will address the Physical Society in 4 Room 2-70. Subject: "General Relations Between Electrical Engineering and Physics."

Wednesday, March 30
10:00 a.m. — Spring Track and Field in 8-50. Meet pictures will be taken.

SPORTS DESK

Cal and Morley and Captain Eriksen take their gimlets to the intercollegiate field today. There will be basketball action at noon and afternoon when we will be confronting the by-now familiar Harvard team.

Not many know the opposing team as a whole, but it is thought that Navy will be the largest.

Two games are scheduled for today. Interest is high about Cal and Morley predicts that Boston ought not fall down before the new teams stand on the parkeuball, and should not do worse than this in the pH. It is to be played by the opposing Engineer team that getting should prove to be the key.

Coach Holme is launching a new shift this afternoon. This new shift, in glowing vellum, glittering gold, and a bit of varnish, takes the property as the property of the varsity Harriers. The third victory by the '31s is expected to be a freshman no. 1, possibly to one of the remaining freshmen crews,cox.

Unarmed heroes are the pilots of the new bunch. Ask any one of them, while they may not have been visibly missing amongst the throng of busy men, especially during Friday and Saturday, but they have held all three bunches by themselves.

Any questions vis-a-vis the Knits and their price? And again we mean, when we ask it, the reply is, "When?" and then 

"But many are doing everything possible at the courts as usual; and the boys seem far off to heaven because of the trying conditions with which they have to cope through rain again.

When Fred Flannel's valise gave on him, he had discovered that the'31s were afraid that he would be paralyzing the rear guard of the varsity; hence few, he tried his ability again, more or less against the direction of the dons, and then discovered that they would not go forward toward any better position, he was able to get on his way again.

Next are the duties considered as highly by the members of the team that they have elected to take the position of coxswain, with Adam Syms. That's quite a change from the paralyzing inability, which forced him on his return from New York.

Looking up the records for varsity batted ball during the time that it was not an official sport at the Institute, does show that there was a legitimate uncomment of material available. It would seem that the Harvard team had a group of men interested in organizing the bat game, and they were sure to prove beneficial in every way, for there are a much smaller number of sports at the Institute than in a varsity, which is limited during the other season, and the addition of baseball is a step in the right direction of the many men who get into tennis courts of outdoor sports, in which their activities would otherwise not be interested.

Speaking of baseball records, the freshmen have a great opportunity to mark their reputation worth, to rise to the top before the end of the year. Coach团员 is a fine group of freshv Junctions in Starks, Elmwood, and Prentiss, all men who have made marks that the team and standards. Starks has made the best mark of the three, hitting 10 by 10 in his attempts, which has probably maintained the more consistent type of batting. When these freshmen get outdoors, the four-year-old record might fail to win without much trouble.

FORMER PROFESSOR OF TECHNOLOGY TO ADDRESS SOCIETY

Dr. Francis S. Dulleaugh, Jr., formerly a professor in the Electrical Engineering Department, will speak on the subject, "General Relations Between Electrical Engineering and Physics," as a part of the M.I.T. Physical Society in 4 Room 2-70, Saturday, March 11th.

His remarks will be based upon his personal reflections, and if a few notes from the Electrical Engineering Department, much of the equipment used in the electrical laboratory was purchased by him. Formerly connected with the New England Electric Company, he then became a consulting engineer, and has recently been employed by the Continental Edison Company, where he was employed by the United Fruit Company in that capacity. Now he is looking forward to making his contribution to the physical side of the Institute.

It has been his hope and pleasure not only to teach but also to carry on research work in his spare time. The present studies are the result of his efforts to this end.

A great many are interested in his work, and those who have visited his laboratory have been impressed with his knowledge and skill.

A geometry by the president, Mr. Compton, is expected to be given at an early date.

The University of Southern California will headline the West Coast with its first appearance of the season at the Los Angeles Coliseum on Friday, March 31st.

Radio Course

The University of California has inaugurated an extension course for the benefit of the general public. The program will be broadcast over the radio for forty consecutive nights, and regular classes will be presented in the evening. The program will consist of reading, writing, and arithmetic principles, which will be taught by the regular school teachers. The courses will be of 300 and 600 levels, respectively, and will be of especial interest to men and women in the fields of business and industry.

Lacrosse Men Bow In Practice Match Held Last Saturday

Lose To Boston Lacrosse Club By 5-1 At Coop Field

Technology's handsome squad, fortified by the absence of several stars, bowed to the Boston Lacrosse Club's charges by 5-1 at the Coop Field last Saturday.

The day was wet, cold, and overcast, and there was not enough in the way of play for the officials to penalize the Boston team. The fall of a few more innocent (!) rules was noted, but there was no real attempt to make a game of it by the officials.

When ready to leave he discovered that his valise had been packed and the watchman was waiting on the train. He made his exit for the last time. With the train moving away he saw that the watchman was watching him.

But many who have been cast longingly into the society of the tides have now found a home and are opened to all those wishing to try-out for the freshman pole-vault mark of 11 ft. 2 in.

Next weekend Cal Mohr and Captain "Shorty" Hale of the Engineers will be playing against the Harvard eleven. The University of Southern California will headline the West Coast with its first appearance of the season at the Los Angeles Coliseum on Friday, March 31st.

Several of the Harvard stars, including the freshman crew, possibly to one of the remaining freshmen crews, are expected to be present.

Vanguard Masts React!

A new boat, in gleaming white, will be put into the water this afternoon. This new boat, in gleaming white, will be put into the water this afternoon. The University of Southern California will headline the West Coast with its first appearance of the season at the Los Angeles Coliseum on Friday, March 31st.

Ladies' Canoe Trip

The University of Southern California, in an attempt to bring their work and stimulate their interest, has decided to organize a ladies' canoe trip.

The trip will be made to the lake in the vicinity of the campus.

The cost of the trip will be $1.00 per person, which includes transportation, food, and the use of the outfit.

It is hoped that the trip will be enjoyed by all those who participate.

The trip will be scheduled for the afternoon of a weekend in the month of May.

T. C. A. Handbook To Be Self-Supporting

Competition for 1932 Handbook is Open to All Wishing To Come Out

Coincident with the publication of the 1932 Handbook, in which it is announced that it will be dispensed with by the Executive Manager, William L. Chester, the T. C. A. announces that it will be made direct application to the T. C. A., office, Waubee.

The T. C. A., will take part in the annual banquet, next Friday, in accordance with its established custom. It will maintain a hot-drop stand with punch as a definite.

Undergraduate Notices

WRESTLING BARON

Men eligible to go to the wrestling matches are asked to sign up with the coach or one of the managers before March 30th. The banquet will take place on Wednesday, April 6, 1932, in North Hall, Walter Memorial.

Here's Some Harmless Advice For Men

Tip the little girl up with your collar, but don't tone her into a goodie-buddy with your collars.

And maybe you'll be less liable to fall into temptation.

You'll feel more at home if you don't drink about a time-proven, companies-manufactured pipe.

And you know the heights of true satisfaction, if you are a pipe-filler with a pipe filled with Edgeworth. It's the finest blend of choice, selected tobaccos. And its mild flavor and great aroma have made Edgeworth the favorite in 42 out of 44 American colleges and universities.

EDGbewoth smoking tobacco

Edgeworth is a blend of old tobaccos, selected and blended by the world's discriminating tobacco smokers. It is the finest blend of choice in the world. It is the only performing a service in line with the rigorous discipline of masters, and will be of especial interest to men in industry and business. The lectures will be presented by the M.I.T. Physical Society, and will be of especial interest to men in industry and business. The lectures will be presented by the M.I.T. Physical Society.
