HEDLAND CALLS FOR TRACK CANDIDATES

Great many boys an opportunity to
build themselves up for the coming season, competing with Harvard, New
Hampshire and Holy Cross, also co-
 operative in the New England Cross
Country at Franklin Park, and Inter-
collegiate Championship at New
York in November. Every year the fresh-
men have reported for Cross Country and a majority of the boys who have
reported have been novices, but before
the season was over they became ex-
cellent runners and by spring the Cross
Country work was shown to be of
great value. All men interested in this
form of recreation should report
on Monday so that we may start
early and be prepared for our dual
meets.

Boys who are active and who
ever did any athletic work previous
in coming to the Institute, should not
hesitate in this consideration, but re-
port and try to see if there is some
chance in their make-up. The
majority of boys rejecting each year
have had no experience; but before
getting through school they become
champions in their event.

Good Substitute for Physical Training
Froshmen are later required to take
physical training for the first year,
but have the privilege of selecting
track in place of P.T. and this gives
them an excellent opportunity of work
more in the open air. Many of the boys
who have solicited track for physical
training can also excel on athletic
teams and receive much prize money.
