FRESHMEN PROMISE VICTORY IN ANNUAL FIELD DAY EVENTS

Earlier Date of Class Day Necessitates Faster Organizations

Fewer freshmen confident

Promising to be the eighth victorious Class of 1933, the annual struggle between the sophomores and freshmen, the older class having always been difficult to organize and impose fines on the occasion of the game, the Class of 1933 is already beginning its organization to that end. Officially the freshmen will begin their plans toward a meeting next Tuesday when they will hear the vice-president and learn the Institute's plans for the day.

The present juniors were successful two years in succession on Field Day as the preceding classes had announced their organization to the fact that both classes would be necessary to conduct the contest and that the junior class promised their co-operation.

Error in Field Day Date

While the date of Field Day has been well known to the Institute Committee, not November 4, but November 2, the error might have been in the mind of the entering class promise that their meeting would be held on November 4.

It has been the custom in past Field Days for members of the two upper classes to act as coaches for the contesting classes in football and track and for the infirmary to come into the game.
