Lindgren Discusses Hoover As A Young Survey Assistant

Was in Geological Expedition To Sierra Nevada Range in California

One of President Hoover's first positions after graduating from Lehigh Stanford was the post of assistant to Professor Waldemar Lindgren, head of the Institute's Geology department, in a geological survey expedition to the Sierra Nevada mountain range in California.

The survey, carried on in the summer of 1914 and 1915, was conducted at a very high altitude, involving many difficulties and much climbing in rarified atmosphere. President Hoover proved a very capable assistant, said Professor Lindgren, showing himself to be a conscientious and efficient man, and giving promise of going very far.

Soon after this survey, his second experience in the geological field, President Hoover left it to go into mining engineering and then to Austin.

Concerning his administration in the last few years, Professor Lindgren had nothing but praise for the President, saying that he had done excellent work under very adverse conditions. "If the American people don't realize him, they will show their lack of intelligence," he stated.

INSTITUTE RECEIVES PORTRAITSMORROW

President Compton Will Accept Works of Miss Browne

The hosital will be formally presented the first four of a series of portraits of distinguished engineers and scientists which are being painted under the sponsorship of Mr. and Mrs. Henry A. Wise, Wood of New York, in the office of President Karl T. Compton, three o'clock tomorrow afternoon.

The portraits to be presented are those of the late professor Ellis Thomas, eminent electrical engineer, and a member of the executive of the Institute, Rear Admiral David W. Taylor, distinguished naval constructor, who from 1914 to 1932 was Chief Constructor of the United States Navy; Dr. Ambrose Swasey, famous as a mechanical engineer who has made important advances in the design and construction of scientific instruments, and in precision mechanics; and Joseph Priestley, the distinguished discoverer of oxygen and founder of the American Chemical Society.

Work of Margaret F. Browne

These portraits are the work of Miss Margaret F. Browne, the well-known Boston artist. They will hang in the various departments of the Institute, and are the subjects of these portraits have been included in the series of paintings of distinguished men.

The portraits will be accepted for the President of the University by Mr. J. L. Stanton, who is expected to make a brief reply. The portraits are painted in oils.

Join us in welcoming the representatives of the respective institutions and in the presentation of these individual portraits.

CORRECTION NOTICES

The funeral services of Professor Harrison W. Hayward were held last Friday afternoon in the Fairview Cemetery Chapel, and not on Saturday afternoon as was announced in the Friday issue of THE TECH.

The names of Thomas J. Kingford, '36, and Eino H. Koota, '36, printed under Phi Beta Kappa in the recent fraternity pledging list, should have been listed as pledges of Phi Gamma Delta.

Albert W. Bridges is Superintendent of the Technology Dining Halls and not William H. Carilda as published in Friday's issue of THE TECH. Mr. Carilda is assistant to the superintendent.

POLL OPEN ALL DAY TOMORROW FOR VOTE

(Continued from page 2)

There has been a predominance of requests for Hoover buttons and Republican campaign literature at THE TECH news offices during the past week, but it is impossible to tell just to what extent this is an indication of Hoover's strength in the school. The recent Republican handbill at the Liberal Club symposium may be reflected in some degree in the poll tomorrow although the total number of votes cast at the liberal club meeting were under one hundred and therefore many believe the results would have been called representative of the school.

Both Platforms In This Issue

The Republican and Democratic party platforms are appearing in this issue of THE TECH, concluding a series of four such articles which have been arranged by THE TECH for the information of its readers.

Teaching is one of the 41 colleges co-operating in this national presidential straw vote. Results of the local vote will be published in Wednesday's issue of THE TECH. On Friday the final results of the national collegiate poll will be printed.

SECTION LEADERS OF '36 TO MEET TODAY

An important meeting of all section leaders is being held today in room 4210 at 4 o'clock at which all representatives are expected to be present. This meeting is being held in preparation for the pep mass meeting which comes on Thursday and a general preparation for Field Day, five days hence. Section leaders have been collecting twenty-five cents from each member of the class to be used in buying football equipment for the Field Day team, and it is expected that this equipment will be bought in the earlier part of this week.

The Field Day teams have been making a better all-around show in attendance and spirit since the last mass meeting, for a full quota has been seen daily working hard with the football and tug-of-war teams. Those men who participated in the Dormitory's mass meeting were under one grudge, and incidentally win the valuable one point.

WITH CLIVE IN INDIA

"Nanou in the Raw" was portrayed by the noted artist, Karl Grosch, inspired by the famous Indian and liam fourteen and three o'clock at Clune and a handof followers, unnumbered. To in 1 by average horde of bloodthirsty moderns on the battle of Plassey—the birth of the British Indian Empire—so described in the famous Flante book. "With Clive to India."

That package of mild Luckies

"If a man write a better book, preach a better sermon, or make a better mouse-trap than his neighbor, tho he does not present in Luckies... the mildest cigarette you ever smoked."

We buy the finest, the very finest tobaccos in all the world—but that does not explain why folks everywhere regard Lucky Strike as the mildest cigarette. The fact is, we never overlook the truth that "Nature in the Raw is Seldom Mild."—so these fine tobaccos, after proper aging and mellowing, are then given the benefit of that Lucky Strike purifying process, described by the words—"It's toasted." That's why folks in every city, town and hamlet say that Luckies are such mild cigarettes.

—raw tobaccos have no place in cigarettes

They are not present in Luckies... the mildest cigarette you ever smoked.
