BOYS OR MEN?

The first step in the investigation of the Walker Memorial is the questionnaires. Questionnaires will be distributed throughout the dormitories, in an effort to sound out the opinions of those who use the facilities of the Memorial. Those who have been numerous complaints lodged against the food and service, and have ventured to eat at nearby restaurants. The purpose of the questionnaire is to collect information for consideration, along with any recommendations obtained.

It is therefore to the interest of the Dormitory residents that they give serious thought to filling out the set of questionnaires and in filling out the form, they are not necessarily as a whole boys who will insist on making a joke of a serious matter, but the number is small, and the information from the many will be valuable.

The investigation lasts for a period of one month, and it is the aim of the Committee to advance at the end of this time. Perhaps the greatest concern is a bit of which is to commence in former years some important personage of the Sophomore class has been the object of its attention, being the most important, itself. Lacking Edwin scholars, this seems to be the only possibility this year.

However, the day is yet to dawn when some genius of class will arise and lead the way to the abolition of all the Sophomore class and then make them nest on their own eggs. That gentlemen, would be the coup d'état.

WHETHER THE WIND BLOWETH

RESULTS of yesterday's presidential straw vote indicate that there is a strong Technology wind blowing for the return of Hoover. Those who count were elated yesterday November 5th, knowing that the student evidence of Republican preference is that of the Faculty which cast an 88 percent vote for Hoover, with the remainder split almost evenly between Roosevelt and Thomas. While it was generally conceded that Hoover would win at Technology, a larger percentage of majority, it is hardly expected that he would obtain more than two-thirds of the total vote. Roosevelt weakness and the possibility of Thomas being quite surprising. The Communist vote was even smaller than anticipated.

At the time of last report, the largest vote was cast by engineers where young engineers think the President's act was to return for another term. The School of Architecture had the largest vote of Democratic vote; the School of Science occupied the largest space to the Socialist and Communist part.

The wind was a change. Roosevelt's "Three Shall Be United" is the vast majority, it is hardly expected that he would obtain more than two-thirds of the total vote. Roosevelt weakness and the possibility of Thomas being quite surprising. The Communist vote was even smaller than anticipated.

At the time of last report, the largest vote was cast by engineers where young engineers think the President's act was to return for another term. The School of Architecture had the largest vote of Democratic vote; the School of Science occupied the largest space to the Socialist and Communist part.

While a variety of reasons might be given to account for the large vote, and the strength of Roosevelt and Thomas, the underlying one is that the Institute is located in a section of the country which has been affected by the depression, the large scale of industries, and the heavy unemployment, and the large scale of industries, and the heavy unemployment, and the large scale of industries, and the heavy unemployment, and the large scale of industries, and the heavy unemployment.
