TIE-WEARING IS UP TO FRESHMEN
DECREASES RULES COMMITTEE HEAD
INSTITUTE COMMITTEE ACTS

HOLLADAY BLAMES
STUDENT BODY FOR
LAX ENFORCEMENT

Amber Uppercum should Assist in Effort to Aid
Rules Observance

APPEALS TO CLASS SPIRIT

Lewis P. Holladay, '36, 3rd, chair-
man of the Freshman Rules Com-
mittee, and last evening’s speaker to the
editor of THE Tech, that his com-
mittee would continue its present
rule of final freshman rules enforcement
the last word which would be enforceable
because the whole spirit is co-
operative and any group of varsity
will take this into its own hands. The
student body comes to the
point where they truly reverse
Technology tradition and will
up the arm, and never again
will technological men without the
cardinal and gray.

Contradiction to Institute Action

This statement seems as a direct
contradictions to the spirit of the
Institute Committee, the student repres-
entative organization, which early
last evening took full cognizance of
the seriousness of the laxity in
enforcement and empowered the Quad-
rangle Club by special motion to take
immediate steps in the enforcement of
the Tech rules. During the meeting Ed-
ward L. Wemple, '33, chairman of the
Walter Memorial Committee, sug-
gested that a personal reprimand to
the members of the Class of 1936
Richard L. Foust might be effective.

FALL SHOWING OF
SENIOR RINGS ENDS

55 Sign-Ups Obtained; Others
Who Want Rings Can Still
Place Orders

Yesterday, the last day of the of-
fall showing of the senior rings,
the total sign-ups obtained num-
bered fifty-five. The ring, bearing a pic-
ture of a beaver on the face and the
four numerals on the sides, presents
an individualistic piece of jewelry, which
also serves to identify the wearer.

These sign-ups have been already
signed up for rings may be de-
layed till December 14 in the main
lobby of the Institute. There
will also be a special show-
ning of rings by the Institute
afterwards early enough to get the rings
made in time for commencement.

AMOUNTS UPPERCUM SHOULD
ASSIST IN EFFORT TO AID
RULES OBSERVANCE
