DYNAMITE IMPLIED

A.A. was to have been expected the featured article appearing in yesterday’s issue has aroused considerable comment. On the part of most students the feeling is that of the matter of dormitory-tractress status could well have been left alone, both in Tech and in our article. In writing the article which will appear in today’s issue of T.E.N. Fossett wrote not on the basis of his own opinions, but rather as a reviewer of present student opinion. The statements made are his impressions of the opinion held by the student body at large. This is made clear in a letter from the Editor of T.E.N. published today.

In expressing a thought which has long been admitted by students and to know of their participation in undergraduate activities. We would appreciate your prompt response to our request for a photograph and "copy" for the record.
