Two Members Of Byrd South Pole Expedition Are Institute Students

Edward A. Filene Opens Series of Aldred Lectures

Prominent Boston Merchant Will Speak at Institute Next Friday

Edward A. Filene, the noted economist and president of William Filene's Sons Company, has been invited to the Institute to deliver the first of the distinguished series of Aldred Lectures. Dr. Filene's reputation for frank discussion of the vital problems of business and industrial management, and of the need for education in these fields, has gained for him a wide and increasing influence in the professional world. His views on the national and international aspects of industry, and his personal philosophy of life, have at no time been more effectively expressed than in his lecture at the Institute.

INVENTORY OF CONCESSIONS

In an address before the annual meeting of the National Interfraternity Conference, Economic Crisis Are Led Astray

Dean, Speaking at Interfraternity Conference, Denies Frosh Are Led Astray

In an address before the annual meeting of the National Interfraternity Conference, Dr. Leonard E. Lobdell, 1'1, strongly attacked criticism of the present economic system. Stating that the oft repeated stories of the present economic system being the cause of poverty and distress are entirely without foundation, the dean expressed his belief that the present economic system is the most effective in the history of the world.

LOBDELL ATTACKS FRATERNITY CRITICS

Dean, Speaking at Interfraternity Conference, Denies Frosh Are Led Astray

In an address before the annual meeting of the National Interfraternity Conference, Dr. Leonard E. Lobdell, 1'1, strongly attacked criticism of the present economic system. Stating that the oft repeated stories of the present economic system being the cause of poverty and distress are entirely without foundation, the dean expressed his belief that the present economic system is the most effective in the history of the world.

Sedgewick Society Holds First Meeting

Dr. Weston, of Harvard, President of the Sedgewick Society, held the first meeting of the society in the Sedgewick Laboratory at the Massachusetts Institute of Technology, yesterday afternoon. The Sedgewick Society, a newly formed group of students interested in the study of the history of science, as well as in the development of the sciences, was founded last spring by a group of students interested in the history of science. The society's first meeting was held in the Sedgewick Laboratory on the campus of the Massachusetts Institute of Technology, where the students interested in the study of the history of science were first founded.
