Six Years Of Dramashopping Gives Producing At Its Best "In Pigeon"

English Student Who Tried Europe On Bicycle Gets Leading Role

By RALPH D. MORRISON, Jr.

With the experience of eight full-length plays and several short sketches behind it, the Dramashopping Company, of which Mr. A. Filene '36 is the producer, is now ready for its best production, a one-act play called "In Pigeon." Written by Mr. Filene himself, this play is a biting satire on the English upper class.

The play will be produced on December 10, at 8 p.m., in the Old Gymnasium, and is expected to be a great success. The cast will consist of members of the Faculty and upperclassmen at the Institute, and the director, Mr. Filene, promises a realistic and well-acted production.

Spent a Month Seeing Europe On a Bicycle

PROOFS SHOULD BE RETURNED AT ONCE

Today is the last day to return the proofs of Senior pictures to the Tech office. Anyone who fails to return his proofs, the Technique management reserves the right to use any picture which they believe is best.

Home Television Will Be As Good As Movies, Baird

Noted Engineer Demonstrates Cathode-Ray Tubes Before Radio Society

Hollis S. Baird, Chief Engineer of the Short Wave and Television Company, stated on Friday evening that it should be believed that the new developments in cathode-ray tubes, television reception in the home would soon be as clear and distinct as acoustic speaking. Speaking before the Radio Society at 5 o'clock on Room 10-27, the demonstration of the cathode-ray tubes was made, and two members of the student body and student body at present was heard to tell his talk on "Modern Developments in Television."

Course XVII Holds Seminar Tomorrow

Discussion of television as related to buildings will be the program for the next seminar held by Course XVII on Tuesday, December 8. The seminar will be held in Room 5-W, and all A. I. E. E. members and their guests are invited to attend.

A.E.E. Plans Trip To New Electric Station

Society Emphasizes National Economic Growth in Program For Members

A chance to see the largest made-over power station to be built in New England will be given to the members of the Electrical Students' Society at the Institute. The trip will be planned by the student branch of the A. I. E. E. and will take place on December 10.

The Newbury St. sub-station, which is under construction now in Massachusetts State, uses acclimatized voltage entirely, to correct the high tension alternating power it receives from the Central power plant before putting it on the rail at the current. Another aspect of this power distribution station is that it can be controlled entirely from the district power houses, so that, furthermore, he is able to operate automatically, and even by itself if one were an automatic master. The demonstration of the new equipment will take place on Thursday, December 10.

See Boston Power House

Those who are going on the trip will meet in the Old Gymnasium at 3 o'clock on Wednesday, December 8. The party will consist of members of the student body and student body at present was heard to tell his talk on "Modern Developments in Television."

MINERS TO BE SHOWN IRON MAKING PROCESS

Pictures on "A New Process for Making Wrought Iron" will be released by the Rivers Company, manufacturers of wrought and cast iron products. The pictures, both in black and white, will be shown to the members of the Mining Students' Society, at their next meeting, Thursday, December 17, at 8 o'clock.

Mr. A. Filene, '36, will read a paper that he has prepared on silver mining. Mr. Filene is the son of a silver mining operator at Hidalgo, Mexico, and is well fitted for the presentation of this subject. Mr. of speakers interest all patrons to attend.

Organization Of Tech Show Now Well Under Way

Tryouts to Be Held This Week For Chorus and Staff Positions

By W. R. SAWYER, '36

Organization of the 1936 Tech Show was definitely under way last week with the announcement that tryouts for positions in the show will be conducted this Wednesday at 7:30 o'clock in the Walker Gymnasium.

Practically all the positions on the show are unfilled. Beginning today, candidates for the Chorus and Senior positions of production manager, and wardrobe and lighting managers, costume and properties manager, and other positions will be called for. As candidates for the offices of assistants, managers, and several assistants in the various departments should report to Tech Show representatives in Room 301 of Walker Memorial any day after 5 p.m.

Positions In Chorus Open

Cost tryouts will be announced in the near future. According to Paul Leape, '36, general manager of the Tech Show, several positions are open, and anyone interested in taking advantage of these offers is invited to apply.

Skiing Club At Institute Proposed

By Member Of Instructing Staff

Write Letter To THE TECH To Explain Possibilities of the Sport

By DR. LEO JURGENSON

(Early Notes: Dr. Jurgenson, a research associate in the Department of Civil Engineering, has become particularly interested in alpine skiing for young men. In an effort to establish the sport among its classmates here at the Institute, he has written the following article for you."

It is a matter of regret that interest in alpine skiing is not more prevalent among the students of the Institute. Our fortunate geographical location, with more than 60 ski slopes within an hour's drive of the Institute, means that we are in an ideal position to take advantage of this sport. However, it is a pity that so few take advantage of the opportunity we have. An attempt is being made to start a ski club here at the Institute, and we encourage all students who have an interest in the sport to become members.
