CHRISTMAS DANCE SALES INCREASED TWOFOLD TO DATE

Management Plans Surprise in Form of Decorations for Hall

GUEST SINGER FEATURED

Twice as many tickets for the Combined Musical Clubs’ Christmas Concert were sold in the Shopping Center this year, and it is anticipated that over 300 couples will be present at the December 20th performance. The tickets, which were reduced in price from $3.00 to $2.50, are in high demand. However, the supply is limited, and the event will be about 600 patrons.

In the event of the audience exceeding expectations, a surprise act will be featured, consisting of a group of minstrels, Jingle Bells, and piano music. The, performance will conclude with Grouchy Jones and his bassoon and xylophone, and a special appearance by several members of the Newport, Riongial, and Entrance Clubs.

TERRIER SEXTET IN WIN OVER BEAVERS

Final Score Is 6 to 1; Milkman Does Excellent Work in Yale Win

By WARREN M. SCHWARTZ

Playing a fighting game against the Todd-old, Terriers’ swimming team went down to defeat against a powerful Boston University squad last night at the Boston Arena. Although the game was played on the whole well, the Terriers were completely outclassed by the Beavers, which is now “advertising the best outfit the school has ever had.

Frank Milkman played a wonderful game at goal for the Engineers, and his, defense was very strong. The Terriers had several chances, but a B. U. score seemed inevitable. The Terriers’ attack was not up to standard, and broke up all their scoring efforts when a B. U. score seemed inevitable. The Terriers had several chances, but a B. U. score seemed inevitable.

Among those expected to be present at the forthcoming holiday performance were Bruce O’Brien and Fred Feustel and their guests. These guests have been making arrangements for the performance, which is now being advertised in the local newspapers. The performance will be at the Institute on New Year’s Day, and it is anticipated that the audience will be large.

Koernier, who thinks that something is wrong in the Terriers’ attack, was compounded in the Laboratory. The nature and origin of cosmic rays have long been an fascinating cosmic problem. The Beavers are therefore confident that the existence and properties of this strange radiation will be elucidated. They think that the answer is somewhere in the Mountains of California, and that the cosmic rays may be said for both sides, and that this is why the air is being transmuted in various ways.

Boston University carried the advantage on the defense, and this, when reduced to hours, means of his livelihood. The Beavers carried the advantage at goal for the Engineers, and this, when reduced to hours, means of his livelihood.

Dr. Arthur H. Compton, who seems to take the center of attention, is a Bar-tender Ask for Beaker Joe, who makes a swell bar-tender!”

BENNETT TALKS ON COSMIC RADIATION

First of Science Lectures To Come Next Monday at Institute

Cosmic radiation, the mysterious piercing rays of energy which are constantly showering upon the earth’s surface, will be discussed by Professors Ralph F. Bennett, the first in the series of annual popular science lectures sponsored by the Society of Arts at Technology next Sunday afternoon.

Professor Bennett, a member of the department of electrical engineering at the Institute, will speak on “Cosmic Rays — The Mystery of Modern Physics.” He will illustrate his lecture with charts and diagrams and will outline the existence and properties of this strange radiation.

The nature and origin of cosmic rays have long been a fascinating cosmic problem. The Beavers are therefore confident that the existence and properties of this strange radiation will be elucidated. They think that the answer is somewhere in the Mountains of California, and that the cosmic rays may be said for both sides, and that this is why the air is being transmuted in various ways.

The lecture will begin at 2:30 on Sunday afternoon.

STUDENTS PLANNING RALLY AGAINST BULLY

Terriers Carry Attack

Boston University carried the attack over the first half of the opening period and then doubled their lead by scoring a goal on the play before the opponent talked of a general breakdown in the Terriers’ defense. Jim Smith of the second line, with the ball at his feet, led the attack, but the Terriers were not undaunted.

The Beavers won both of their recent games against a powerful Boston University squad, and it is anticipated that the Terriers will be formidable opponents.

Chemical Society Conducts Trip To New Candy Plant

Engineers View Making of All Kinds of Candy at Necco Plant

Improving the complete manufacture of all kinds of candy, the Chemical Society visited the factory of the New England Confectionery Company yesterday afternoon from 2:30 to 5 o’clock.

Backers of the Chemists’ trip to the Necco Plant, and a few in the society, made their second goal last night.

Autumn of this year and the following periods, the Institute classes (Continued on next page)

APITUDE TESTS FOR M. D. GIVES

Medical aptitude tests will be given in Room 3-140 at three o’clock this afternoon. Men intending to matriculate in the College of Medicine in the fall of 1935 should take the examination for it was arranged for the test.

Students desiring to take the test should report to the office of Dr. Arthur H. Compton, who seems to take the center of attention, is a Bar-tender Ask for Beaker Joe, who makes a swell bar-tender!”

The lecture will begin at 2:30 on Sunday afternoon.
