THE TECH

SOUVENIR SIGN HANGS IN T. C. A.

The story behind the sign "Handicapped" which has been hung in the T. C. A. office early this week is that the member responsible for it has been so handicapped for the past few weeks by an injury that he has not been able to attend classes. The sign was placed in the T. C. A. office to serve as a reminder to all members of the T. C. A. that they should cooperate in practicing the code of ethics that has been adopted by the T. C. A.

PROFESSOR FREEMAN HITS TECHNOLOGY THEORIES

(Continued from page one)

free technical labor, and more efficient and economic field of employment, as a member of a modern society must be able to identify himself with those who are working on another type of machinery for the production of goods and services, and to develop a fairly broad knowledge of the operation of that machinery.

Upgrades Federal Credit System

Although the technocrats approve the principles of the production of goods and services, Professor Freeman pointed out that great hazards of wealth have been ameliorated by people who are unable to identify themselves with the production of goods and services. The technocrats have denounced as being unable to identify themselves with the production of goods and services.

FACULTY VOTES TO HOLD OPEN HOUSE

(Continued from page one)

It would be much better appreciated if it occurred only every other year. Hence it was omitted last spring, and was last held in 1931. Consequently this will be the tenth time in the history of the Institute that it has played host to the public at large.

In 1931, at the last Open House the Institute accepted approximately 9,000 people at the Institute, and this year the Institute has increased its popular appeal and has doubled the number of people entering the Institute. The Institute has improved the facilities on the campus, and has acquired a number of additional attractions.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY

CAMBRIDGE

The Massachusetts Institute of Technology offers courses in Engineering and Science, each of which leads to the degree of Bachelor of Science in Engineering, or to the degree of Bachelor of Science in Science. The courses in Engineering and Science are offered in five years, and the degree of Bachelor of Science is awarded in four years.

The last two years in the degree of Bachelor of Science are offered in the Engineering and Science schools, with the exception of the degree of Bachelor of Science in Science, which is awarded in the second year.
