NEED THEY BE DEAD?

UNLESS sufficient evidence of action is shown by the follow-
ing group, the group of the next decade, the Harvard-Hall Committee, they will no longer be officially active. The societies which have been supporting this activity, the Harvard-Cambridge, American Archaeological, American Historical, and the like, have the power to cut out the dead wood that is lying about the Institute, but could not some of the original enthusiasm be displayed? We have not heard that there are one or two societies which might be of some value and of real use to the student, but they must revive quickly or lose their charters.

UNREST IN EUROPE

SINCE the Nazi victory at the polls in Germany, the other countries of Europe and of the rest of the world have been holding their breaths, hoping that serious internal difficulties will not lead to the surface and become world-wide. Censorship of the press has been complete. Tales of horror and disaster have been received only from fleeing Jews, hastening out of Germany for their personal safety. France is standing by with a worried frown as the new regime creeps for its "place in the sun".

At the same time, England and Russia are threatening to become the next countries to fall. The whole world has projects for its defense, and the young people in Europe are too busy in exterminating the major threats in the side of peace, armaments.

We are unable to keep the spark of unrest from bursting into full flame, the fodder of internal national hate and selfishness must be forgotten in the greater struggle for peace and unity.

BETTER HUMAN BEINGS

PROFESSOR MAGOUN'S famous course in Humanities, Professor Schell's lectures on the technique of the interviews, the organization of commuter's clubs at M. L. T. all point to the trend in university training, to teach not only the historic English and Calculus, but to do a little developing of men.

Our leaders in politics, in banking, in industry, are many of them interested in the College. They are competitors or employees of the average student who has received a course in Education of Humanities. The community as a whole is finding how the better education of the individual means to the community an increase in the individual's value to the community.

Administrative officials of colleges across the country are realizing the truth of Colonel Goering's pronouncement that scholarship work is but 15 per cent and personally the other 85 per cent. The future is toward individualization of Education of Humanities. Technology will follow the lead of the western colleges (would that they would all have it!) in recognizing its obligation to the community to do far more with its material than it does now.

During the last decade the Institute followed the advised policy of both the College and the Harvard-Hall Committee and introduced more cultural subjectts into its curriculum. More emphasis is being placed on General Studies. The next decade will set the trend toward a more personalized Education of Humanities. Technology will follow the lead of the western colleges (would that they would all have it!) in recognizing its obligation to the community to do far more with its material than it does now.

Technology has the advantage of being a more personalized, social and political, business ethics, individual and group psychology and survey course on subjects new considered far afield from the study of education.

Our leaders in politics, in banking, in industry, are many of them interested in the College. They are competitors or employees of the average student who has received a course in Education of Humanities. The community as a whole is finding how the better education of the individual means to the community an increase in the individual's value to the community.

ANNUAL REPORT OF THE TECH

TO THE EDITOR: The Tech

Dear Sir: We have just come across a notice of an organization to be

Our leaders in politics, in banking, in industry, are many of them interested in the College. They are competitors or employees of the average student who has received a course in Education of Humanities. The community as a whole is finding how the better education of the individual means to the community an increase in the individual's value to the community.

This time, however, we think things have gone beyond the ridiculous.

The gist of the story is that the Baldfield organization, in an attempt to show the world what it can do when the world has ever endured to lead the world to think, decided to make an example of us, however, we think things have gone beyond the ridiculous.

We understand the students must only the most sizable stipend of twenty-five cents for this minucious and, besides, if they have their own little grills and somebody has to put the buns in them around the time in the tutorial room, from which we are sure they may receive callers. And in chaps will never, as above, there are so many.

We understand the students must only the most sizable stipend of twenty-five cents for this minucious and, besides, if they have their own little grills and somebody has to put the buns in them around the time in the tutorial room, from which we are sure they may receive callers. And in chaps will never, as above, there are so many.
