Graydon L. Abbott, '34, Leads Corporation XV Stock Contest

J. H. Kemper, J. F. Freeman, and R. F. Bailey Follow In Profit Making

Jasna W. Vrinar, President of the Society of Engineering Alumni, recently stated that Graydon L. Abbott, '34, was leading in the Stock Contest with a profit of $420. Another student, J. F. Freeman, '36, and R. F. Bailey, '36, have made sizable profits in the contest.

These computations were made last winter by Morton Hedric, a freshman, who made a study of the computations and calculations and selling it at several times. The 1930-31 contest was won by E. C. Sterrett, '36, whose profits of $1297 were gained by buying and selling stocks. The procedure of the Stock Contest is as follows: each contestant must deal in a sum of one thousand dollars, from which he may draw money any day at the regular bank, and stock and must buy and sell the New York Times (Continued on page four).

A.S.M.E. ARRANGES OPEN HOUSE SHOW

Shulls thrilled in huge tangerine colored buttons and the breaking of large bunches of rice, snake and specimens of brick work. The students were impressed by the enthusiasm of the American Society of Mechanical Engineers, which was exhibited in May.

Almost all the machines in the Stearns and Hydraulic Laboratory is, capable of the largest and the triple-expansion engines and the high tension engine in operation under test.

In the Technical Library Professor Edward R. Schwartz has arranged a three page program, designed to make use of all the various types of equipment and appliances, which automatically replace the various operations and shows a step-stone trend for a newer class of machinery and weaving machines.
