Recognition of Manchuko Needed

If Peace in East Is To Be Realized

CHINESE WELCOMED JAPANESE ADVENT

Chang Hou-Lung, Bandit Leader Was Milking Country Dry

Mr. Tidels, who is a resident of Korea, Japan's ambassador to Russia, received Dr. Maximo, president of the University of Moscow, last Saturday in his home. The meeting was the first since Japan's occupation of Manchuria two years ago. The meeting took place in the ambassador's residence. The meeting lasted for about an hour. The ambassador and Dr. Maximo discussed various topics, including the situation in Manchuria, Japan's policy, and the future of the region.

As We See The Movies

PAIN

"Gardens of Love Friederike" Out of the waver of tear-stained, rye-germ, and lily-of-the-valley, a refreshing burst of yarn, bitter-sweet, and romance brought to the screen in the new film, "Gardens of Love Friederike". "Friederike" is the tale of the beautiful, child-like beauty, and the last daughter of a small town near Friederike. The young poet, already famous for his immortal lyrics, finds in the sky Friederike at last, the sky she loved in her younger days. Friederike, as one of the world's most famous and tragic love stories, the passionate attar, the soul of the nation, the call of glory and renown, and the fully-fledged hero of the French Revolution, is brought to the screen in the new film, "Gardens of Love Friederike".

The Grill Room meals are the finest to be had at such a reasonable price. Ask the student who eats there.

TECHNICAL DIETING HALLS

"Diet: A Life of Science, Art, and Industry" Design and operation of an antiseptic, unattended, no-mess, all-purpose, vitamin-enriched, meal. As a result of a new method of sterilization, a new type of dry food has been developed. This food is not only nutritious but also convenient to use. It is packaged in small, easy-to-handle packets and can be cooked in a small amount of water. The method of sterilization is based on the principle that the food is totally sterilized by exposure to a high temperature for a short period of time. This method allows for the retention of the food's original flavor and texture. The new food is being used in the United States, Japan, and Europe, and it is expected to be widely adopted in other countries as well.
