Appointments and Promotions Fill Faculty Vacancies

Caused by Recent Retirement of Several Prominent Professors

Promotions and retirements of several prominent members of the teaching staff at Technology as announced recently.

In addition to the retirements of Dr. Davis R. Dewey, head of the department of mechanical engineering, and Dr. Waldermark Lindgren, head of the Department of Geography, with the title of professor, when their terms of appointment expired last month, Professor William A. Johnson, head of the department of aeronautical engineering, and Professor W. A. Johnson, a number of the students, a member of the staff of the Department of Mechanical Engineering, will retire with the title of professor emeritus.

Prof. Borgard in Naval Expert

Mr. Lanza, who is also a prominent member of the Marine Engineering Society of the Institute, was also recognized for his contributions to aeronautical engineering, which will become a member of the Board of Directors of the Institute, and will be succeeded by Dr. Davis R. Dewey.

Dr. Jerome C. Hunsaker

INSTITUTE ALUMNI SCHOLARSHIPS GO TO TEN FRESHMEN

List of New Students Receiving Awards Includes Name of One Co-Ed

The Technology Regional Scholarships will be awarded to the following entering students:

Bibliography: John B. Dukin, who attended the roofing school, Chicago; Philip H. Peters of Elmhurst, Illinois, who attended Oak Park and River Forest Technical High School.

Kaman City, June 1. Division of the Oak Park and River Forest Technical High School.

Walker, Diane D. Weak, who attended the end of his study and has been appointed to succeed his father.

Al bert V. Smith, whose father, Major Allan S. Smith, was appointed to the U.S. Navy, will be in charge of the Engineering laboratories and will have unrestricted opportunity to carry forward important investigations.

THE TECH Invites Staff Candidates to Annual Smoker

Several Prominent Alumni Will Address Prospective Members in Newspaper

Three prominent alumni of the Institute will be guest speakers at the annual smoker of THE TECH staff, when it entertains the freshers at its annual smoker in North Hall, Walker Memorial on Thursday at 8:00 o'clock.

The speakers are Arthur D. Little, S. J., an authority on chemistry; Charles A. Walker, '81, editor of THE TECH; and Isaac W. Litchfield, '85, associate editor of THE TECH.

Professor Edward F. Miller, of M.E. Department, Died During Summer

Had Been Member of Institute Since Graduation in 1880, Head of Department During Last Twenty-Two Years

Shortly after completing his forty-seventh year as an instructor and faculty member of the Institute in 1880, Professor Edward F. Miller, head of the Department of Mechanical Engineering, passed away at the age of seventy-six on his home in Newton Cottage. The late professor, known as "Eddie" Miller to his hosts and friends and as "the General" by his students, had been connected with the Institute since his graduation in 1876.

As teacher of mechanical engineering at the Institute since 1876, the year of his graduation from Technology, and as head of his department for many years, Professor Miller was known to hundreds of the alumni and students. Among those who, as Sir Humphrey Davy would say, were "puzzled wise with true diggings."

Walker started the Tech Smoker in 1876, and from that time the Institute has been the leading college in the field of aeronautical engineering.
