Professor Szasz to Give Lectures

(Continued from Page 1)
Professor Szasz has been a member of the faculty of the University of Frankfurt in Germany since the school's foundation soon after the war. Previously he served as an instructor at the University of Göttingen.

Awarded Hungarian Prize

A native of Hungary, Professor Szasz was recently awarded a notable prize in his country for excellence in mathematical analysis. He is a former student of Budapest's renowned Budapest University, one of the founders of Hungary's important school of mathematics. Particularly as a result of extraordinary emphasis placed on mathematical study by the Hungarian government and university in recent years, has contributed one of the most brilliant scholarly groups in the world.

Master of Clear Expression

Professor Szasz is known as a master of clear exposition, and is the author of seven textbooks and a number of professional papers. For many years he and Dr. Norbert Wiener of Technological University of Massachusetts have worked on the development of a mathematical theory of science. Among other works, he has contributed to a comprehensive mathematical exposition of the human sciences.
