Student Thought on Continent is Told by Holland

Secretary of International Council Described Nazi Opinion

SEES PROGRESS IN PEACE

"World is peace is possible and altogether likely," was the opinion expressed by the Secretary of the Department of the International Student Council, in an address on "Student Thought on Continent" yesterday afternoon in the Eastman lecture hall.

In his opinion, although the mechanism of the League of Nations is not perfect, "I am convinced that we have made more progress in the last two years in settling disputes in international courts as we have individuals settling disputes within our homes." He also said that "International Relations Worth While," and that "relation of the United States to Europe are worth while, and will be of value from 1924, and that the condition is maintained as long as European Socialists or Nazi Party in Germany. He then proceeded to describe how the situation in Germany was gained by him from contact with young American men and women who had been in Germany since the last revolution in 1918, when the Allies occupied the Rhineland District of Germany. The Nazis which are described in the manner similar. Therefore, if France should take the stand that France is an invader and not a victim then Treves and the Rhineland, war will certainly ensue, according to him.

Moreover, the students believe that Germany's loss of territory is the issue for the economic depression from which they are suffering. In their opinion, there is no hope unless they themselves, are made to realize, which would necessitate a war.

Frosh and Sophs Battle in Dorms

Eggs and Fruit in Rioting After Freshman Dinner Last Night

Eggs, vegetables, and fats were freely scattered in incandescent parts of the dormitories last night after the Sophomore class attacked the freshmen returning from the last dormitory dinner, with return eggs and vegetables from the roof of Munroe.

The first part of the freshman is immediately rushed to the roof and forced their way through the dormitory to the entrance of the dorm. The lighting here was handicapped by the darkness, so the mob rushed down to the fifth floor, where it ran into a new group of Sophomores, several Sophomores locked themselves in the dormitories and proceeded to give other showers, with re-enforcements from the roof via the ledge and window.

Sporadic fighting continued for about three-quarters of an hour. It was during one of these fights that the freshman put his feet through a window, which put them into the roost.

In the meanwhile, showers of water and occasional rotten vegetables—the eggs had given out long ago—continued with these and with re-enforcements from the roof, they were able to get the dormitory empties.

The property damage seemed to be confined to two discolored doors, one polished doorknob, one pair of glasses, one window-pane, and various items of clothing.

Max Yergan

Max Yergan Will Tell of His Work in South Africa

Max Yergan, T. H. C. A. secretary in South Africa, will be the first of a series of talks by members of the various international societies and Chinese societies to meet the students of the young men for the latest one to be held in the Student Senate. The talk will be given by Max Yergan, who is a graduate of the University of South Africa. He is a graduate of the University of South Africa, and has been accorded many other high titles, including the Nobel Prize in Physics in 1930. He is a member of the South African Academy, and has been awarded the Harmon medal in 1926 for his work in the field of engineering.

The talk will be given on the 4th of March, and will be followed by a meeting of the various international societies and Chinese societies to meet the students of the latest one to be held in the Student Senate. The talk will be given by Max Yergan, who is a graduate of the University of South Africa, and has been accorded many other high titles, including the Nobel Prize in Physics in 1930. He is a member of the South African Academy, and has been awarded the Harmon medal in 1926 for his work in the field of engineering.

NOBEL PRIZE WINNER

Professor James Franck, distinguished German physicist and former head of the Physical Institute of the University of Gottingen, will be the guest of the department of physics of the Harvard University and Technology during the month of December, and has been announced.

Professor Franck was awarded the Nobel prize in physics in 1925, and has been a member of the American Physical Society, and has been accorded many other high titles. He is a member of the South African Academy, and has been awarded the Harmon medal in 1926 for his work in the field of engineering.

ALUMNI OFFICIALS

ATTEND AGAWAM CLUB

President E. K. T. Compton, Dr. Allan O. Ross, member of the panel of the Board of Education, and a member of the alumni association, and Professor Charles E. Draper, member of the alumni association, were the guests of the alumni association, and attended the meeting of the alumni association last night.

Freshmen and Sophomores were present, and were able to attend the meeting. The Alumni Association is a quarterly meeting, and is held in the Alumni House.

FRESHMEN ATTEND TECH SHOW SMOKER

More than thirty men turned out for the Tech Show Smoker last Friday evening at five o'clock to augment the ranks of former show men who re-announced fills an old tropes over the glasses of cider to hear John M. Hitchcock tell the new men about the activities of the student body, and the student body, make salient comments concerning the shows, which are held at five o'clock, and the task set before the new men.

"You have got to have a show this summer," he announced ardently, "and there is no 0.00 waiting for the group who have written the shows. He went on to describe the various features of the activity show, and the work of the group of people who have written the shows, which are held at five o'clock, and the task set before the new men.

"You have got to have a show this summer," he announced ardently, "and there is no 0.00 waiting for the group who have written the shows. He went on to describe the various features of the activity show, and the work of the group of people who have written the shows, which are held at five o'clock, and the task set before the new men.

Hitchcock outlined the organization of the show staff, showing the division of the activity into the business, technical, and experimental departments. Paul Lappe, in concluding an informal talk about the student body, made a point concerning the fact that the men who have written the shows have had ample chance to exercise their talent and which is the sum of the whole.
