**Sigma Xi Chapter May Be Installed at the Institute**

A petition is being presented by the establishment of a chapter of Sigma Xi, honorary research fraternity, at the Institute, to be presented at the meeting of the national council about that organization this month. It is expected in official circles that favorable action will be taken, and that the new chapter will be organized next spring.

In the past an attempt has been made by members of the fraternity to become members at other colleges to establish chapters, but the enthusiastic support of Sigma Xi at the Institute has failed. Now, through memonetary to be carried over, enough support has been gathered to establish a Sigma Xi at the Institute.

**ENDORSED BY COMPTON**

Professor Harvey F. Philpard, '37; Kathleen S. Fuller, '39, and one each from the Physics Department, and in the future it will play an important part of the teaching staff. In the past the Physics Department has been regarded for years as a mere laboratory, but in the future it will play an important part of the teaching staff.
