This Week in Walker

The cover story this week is a discussion of various topics and issues affecting the lives of those at MIT. It features a variety of essays, articles, and editorials, providing readers with a comprehensive look at the events and debates of the day. The issue includes discussions on the National Recovery Act, labor relations, and the role of technology in society. The cover story also highlights the contributions of MIT students and faculty to the broader community. The issue concludes with a section on the Happening of the Week, featuring events and happenings of interest to the MIT community.
