THE TECH

ALUMNI AND ATHLETICS

T APPEARS that Yale University's foot-
ball team did not have an exceedingly
successful season in 1935. Although the
alumni clamored loudly for a new coach, whose
choice they seemed eager to dictate, the Alumni Association of Tech
natics had undisturbed control over such
matters, this situation probably appears
understandable. It is of no great moment to him,
whether or not we turn out a winning team.
He realizes, in any case, that the coach and
the athletic manager have done their duty.

At the close of each season the question of the
choice of a new coach for football comes before the
alumni for discussion. This year, however, the
alumni have no desire for change. The
Alumni Association of Tech Athletics is the
organizing body of the football team and
thus enjoys full control over the coach.

The football team is one of the
most popular of the sports, and
the alumni have been consistently in favor of leaving
the management of the team in the
hands of the Alumni Association.

The desire to see how their friends have
changed and prospered, to view again scenes
of bygone days, has been the
primary motive for giving alumni
the opportunity to note the
good old ways as practiced
when the French people were relatively pros-
sperous, is apparently the
merrier.

If you don't believe this just drop in
and see them. They'll let you
in.

The Tech is a weekly publication of the
Massachusetts Institute of Technology, published
every Friday at the Institute by the
students. Entered as Second Class Matter at
the Boston Post Office. Telephone, University 7415.

REMEMBRANCE OF THINGS PAST

A NNUALLY the alumni of the Institute
honor the memory of those friends who have
passed on to the higher world, from the four corners of the earth, drawn
together for the same purpose by a common
motive. Some of them go to considerable expense
and trouble to attend a function which
on the surface seems no more important than many they can experience at home.

They are drawn here by memories, memo-
rable voices, of faces, memories which are
squeezing their sharp edges and growing
dim. They are also here to keep our enormous recovery program free
of debts.

This would of course be an excellent plan
but also made to drink (by far the greater
part of these alumni). They really enjoyed
the time, and murmured that the sometime
smart pants was the only one.

Remembrances of their youth, of things that
had been done, of things that might
have been done. It's a great
time...a little smarter now
than before.

THE Palaestine Resister

is up and about this issue. He's been
working on the Palestine situation for some
time now and plans to keep it up.

ARGUE? WHY NOT?

The sound system which has been
in the process of installation for an
unspecified period of time is now ready and testable at any time for our
listeners and Analysts, who have
been a bit dissatisfied about a dozen
subjects per listener. It is an extremely
acoustically efficient system that is
being used regularly in the freshman
chemistry classes. The sound system
is made up of a line transformer used
for extension of the audio input
speaker to about 70% of the line level of
the output of the transformer, thus
of two types. A desk microphone
is used in most ReSharper classes, but for
most athletic activities, this situation
probably appears peculiar.

The sound system is capable of
playing music at a distance of 20 feet
from the equipment.

JORDAN MARSH COMPANY

STORES FOR MEN

A Separate Store in a Separate Building

Complete Snow-Track Equipment

Northfield ridge-top kickers, $2.50 to $7.50
Ski boots, $6.50 to $9.95
Snow shoes, $12.50 to $20.00
Snowshoe bindings, $1.25 and up
Men's skis, $2.50 to $7.50
