CALENDAR

Friday, February 16
2:00—American Society of Civil Engineers to meet at 140 Cooper to Deer. Corner Massachusetts Ave. and Memorial Drive.

Saturday, February 17
2:00—Aerostat Research Laboratory.
2:50—Brev. Theta Pi Basketball Practice, Hanging Gym.
7:00—Annual Alumni Dinner, Main Hall, Walker Memorial.
8:00—Wellesley-Rosliande Dance, Commuters’ 5:15 Club.
6:00—Dormitory Dinner Club, Grill Room, Walker Memorial.
5:00—Tech Show Chorus, Commuters’ 5:15 Club.
5:30—Aristocrats Rehearsal, North Hall.

Friday, February 23
5:00—Commuters’ 5:15 Club showing of the film, "Technology," Room 10-309.
6:00—Chemical Club Meeting, Dr. William H. Walker, Speaker, Moore Room Building 6.

WEATHER CONDITIONS

(Continued from Page 1)

To reply upon their speed of descent.
Professor G. R. Ray, director of the division of meteorology, and L. Hansmann, research associate, see in St. Louis with newly de- signed meteorographs, one of which is attached to each balloon.
Dr. J. L. McGinnis of the distinguished Norwegian meteorologist who is now visiting this laboratory, has made balloon flights at Cambridge and Dr. C. W. Wil- liams and the Department of Meteorology. The weather forecasts upon which we based the release dates of the balloons at sea. The informa- tion gathered in these upper air ob- serves those caused by more complex earth- forces, such as wind, as well as a mid-continent location for the quake forces. Once the engineer has his laboratory. those caused by more complex earth- forces, such as wind, as well as

ENGINEERING FIELD

Much Overlooked

Says David Finke

Too Many Engineers on Market,
Hence Good Education

Opportunities in the field of en- gineering are found to be limited, according to the statistical analysis made by David L. Fiske, Secretary of the American Society of Civil Engineers. The answer to the que- tion asked, "What is the average income of engineers?" is "Yes" in the case of engineers who hold the right of the medicine. The data used relate to the numbers, and employ- ment during the period of 1929 to 1930 with a forecast of their possible educational value.

According to Fiske, "the number of engineers ... is the key to their socio-economic status rather than their "training, abilities, inness, or- ganization, or something even more weight." As an observation of our professional public, which has not had little attention, in the past, is more fundamental, the engineer should be concerned with conditions of competition. For the purpose of the engineer is determined by the season of the
