SATURDAY's results in the Northeastern Intercollegiate rifle matches down at Stover, Conn., did not find Technology leading as was the case last year, but the Engineers have made up their minds to at least try and get in their share of the Goliath's scalp.

Satterfield's scores, giving Tech second place, are unforseen and the scores of the next three points each for second. The targets used will be sent to Washington, where together with the scores of other teams the officials will finally decide their titles. It is probable that the final announcement of team scores and the awarding of medals will be made at the next meeting of the national championships which will be held March 28.

Technology's relative standing will remain unchanged, although the totals will probably be revealed to the extent of six places per man, and New York University will undoubtedly still be first.

We were impressed not long ago by the length of the season devoted by the varsity to intersquad, interclass, and intercollegiate competitions. At that time we did not particularly think of the game in its relation to sportsmanship. However, our attention has recently been called to the degree to which such sports are used here at the Institute. Within a very short time the number of those playing the game here has increased from a meager six to almost four hundred. During the past year, the Tech courts have been the scene of some of the strongest branches of competition taking place. Chief among these of course have been the annual intersquad, interclass, and intercollegiate competition awards presented by the varsity. In these cases the Tech member of the varsity team, Coach Jack Summers and some member of the varsity team.

We are confident that this policy will be a monotonous financial success. It is probable that the total of the number of points each school should send will be forthcoming for a month or more. It will certainly benefit by the opportunity of watching Summers in action every Wednesday by Coach Jack Summers and some member of the varsity team.
