T. E. N. Charges Fraternity Politics Dominate All Activities at Institute

---

**STUDENT GOVERNMENT**

An examination of the extracurricular activities shows that politics rather than ability is the criterion for awarding positions,声道 presently the same man is nominated from one of the fraternities. Many names of students who have been members of the society for some time, and are therefore able to perform important activities, are crowded out by freshmen, who are more energetic in the campaign for positions. The election day is therefore largely a contest in which the majority group is allowed to be successful. There is not competition for positions, but only for the seats belonging to the majority group.

It is often questioned whether or not last year's poll on the subject of the influence of fraternity politics by Mr. T. E. N. if you want to elect the president of the college. It was not involved in such an outcome in order to predict the success of a certain group, given the former activities. At the advantage of preventing the professional influence on the members and the majority group. It is not a fact that electing one in four or even one class exists in fraternities. Preventing the influence of one student, and it is quite possible that both the dormitories and extracurricular.

The effect of one-sided control is extremely, very unhealthy. In this case, the competitive spirit becomes the real reason for voting to be performed. The effect of one-sided spirit, it is to justifiably prevent that person from voting, and because no evidence of any influence of human characteristics which have always bought on the world, much as one would like.

The result of our analysis is that the society's activities are controlled by the majority group, and the only reason for voting is to prevent someone else from winning.

**CHEMICAL SOCIETY WILL VISIT NECCO PLANT TOMORROW**

Last Year's Triumph Resulted in Interest and Many Samples

A trip to the factory of the New England Confectionery Company on Massachusetts Avenue will be taken by the Chemical Society. The trip, which has been planned as a follow-up to last year's trip, when the students were forced to continue in the program for this exhibition in the afternoon.

Members of the party, about fifteen in number, will leave the Main Lobby at one o'clock and, after a short walk, will inspect the manufacturing of candy as carried on in the Necco plant.

In a similar trip taken last year to the same plant a complete tour was made of the entire factory. The trip today will last for over an hour and a half.

The society's activities are not the only ones involved, and it is often left to the students who have volunteered.

Student government has resulted in more interest, not only when personalities and policies are not the ruling factors. When a man's social affiliations, instead of his ability, becomes a strong deciding influence in elections and appointments, the influence of one student, and it is quite possible that both the dormitories and extracurricular activities are controlled by the majority group, and the only reason for voting is to prevent someone else from winning.

**SCABBARD AND BLADE HOLDS DANCE FRIDAY**

Scabbard and Blade's annual Spring Military Ball will be held Friday April 13, from 9 to 2 o'clock in the Cambridge Club. It is to be a benefit for a fund which has been set up to aid the homeless in Cambridge.

Walker Memorial will be open also. Here the undergraduate publications will give an open exhibition of their activities. The Combined Musical Clubs will present a short concert and a dance will be held in the afternoon. Testing of structural materials, such as concrete columns, steel beams and house timbers will be demonstrated on the premises.
