**Longer Vacations**

The general class cutting which took place immediately before the spring recess from April 18 to 22, illustrates an unfortunate feature of our holiday plans. Many students living outside the city, especially those who live long distances away, did not wait for the scheduled first day of the vacation but took leave the preceding week-end in order to have a longer period at home. The condition must first be attributed to laziness on the part of the students who take these additional days off with some perils of conscience but without bothering to make up the work they miss in the last few classes. This they can do by borrowing notes from those who do stay, or any other method they see fit. The situation is such that Japan considers that no other country except China is in a position to share that responsibility.

"Japan will oppose any attempt of China to avail herself of the influence of some other country over people, supplying China with war planes, building airbases and detailing military advisors or instructors to China, or contracting a loan to provide funds for political uses, would obviously tend to separate other countries from China."

"The situation is such that Japan must determine what foreign enterprises might encourage war in Asia. It is our responsibility, we must try to prevent this from happening."

News-Week for April 28th mentions some statements from the Foreign Office spokesman Amsa four days previously, "Japan considers that to keep peace and order in East Asia, she must set no foot in any country to meddle in the affairs of countries with which it has no business."

"Japan must not interfere in the affairs of countries to which she has no connection and cannot be expected to help." This statement is, of course, quite true, and we wish that Japan would keep her hands off the affairs of other countries.

The situation demands that Japan should not interfere in the affairs of other countries, but it also demands that Japan should not interfere in the affairs of her own country. The situation is such that Japan must determine what foreign enterprises might encourage war in Asia. It is our responsibility, we must try to prevent this from happening.

**German Students Invite their American Friends**

FIVE tours through German cities, with one each per day, including board, in each of the nine power pact countries. The following two tours are for 23 days.

1. Germany, Austria, Italy, Switzerland, and Belgium, with one each per day, including board, in each of the nine power pact countries.

2. Germany, Austria, Italy, Switzerland, and Belgium, with one each per day, including board, in each of the nine power pact countries.

For both these reasons the amount of work done in the last classes by those who do stay to the end is less than that done by those who leave early. The tendency to let down during the final classes and make up for it afterwards.

"The student in many cases feels that the vacation is short enough anyway, and that he will be obliged to continue the "grid" into at least part of the vacation. The tendency to let down during the final classes and make up for it afterwards.

After golf or tennis, you’ll find me most refreshing.
