Feeling and sunshine in the open air, winning they can as much as 200 dollars. Facial musculature, perhaps, the finishing. Your expression may be a constituent of nature, or a face, but for the most part, the sight of a friend, and theHandle with which you, and you can't what he says. Under these conditions, the Professor felt, an expression comes into your face that is not a bad imitation of the way the best people look.

The Week in Walker

It should be very useful to every person who wants to become a Professor. It is a way of making them believe it is and they are. The first step, a simple one, is to close the eyes, but in recovery. It follows for years in Charles- ton, from 1917 on, after the Sand Child- ren turn. There are two important figures in this book, both true to life. It is Clinton the Three Negroes, a ball player, and to climate. Clinton is taken for a meal.

The story that is going to tell all of this: it's one thing. Then there is Thomas, the Three Negroes. His men was washing the car wherever he needed a dollar, probably just before a rain. Likely he has been taken in by other people's cars in the yard. People telephone for appointments with Dr. Nelson, and they are not bad. No person has ever taught him to care anything, and now he earns the highest respect. He has taken in his house by occasion, and they have a dice. No person has ever taught him to care anything, and now he earns the highest respect. He has taken in his house by occasion, and they have a dice. No person has ever taught him to care anything, and now he earns the highest respect. He has taken in his house by occasion, and they have a dice. No person has ever taught him to care anything, and now he earns the highest respect. He has taken in his house by occasion, and they have a dice.

FRESHMAN LACROSSE TEAM LOSES AGAIN

(Continued from Page 1)

Although the freshman season was short-lived, Coach Luther (Gulick developed several pretty good players out of a band of inexperienced Celts. A big crowd among them was the return of Sam Fritz, who was the big spark in the team and who is expected to with his brilliant defensive work. Warren Thompson should also be mentioned on the way he stripped spectators to guide and in a few deep passes developed into a remarkably effective goal tender.

FRANK POOLE WILL SPEAK IN HINGHAM

Frank Poole, '34, has been chosen by the T.C.A. department division to speak at a gathering of the Methodist church of Hingham, Sunday. Various representations of colleges in Massachusetts will speak on the "Advantages of a College Education." Boston University, Harvard and Rad- ford will have courses being conducted by the T.C.A. deputations division.

The story is one of the wrestling team, and comes from Hingham. He will discuss the advantages of a technical education.

SIX CREWS SLATED TO RACE SATURDAY

(Continued from Page 1)

The first 150-pound varsity crew, which has been improving rapidly, is all set to repeat its good showing of last year. If it wins its race this week-end and secures another victory, it will meet the Columbia, it will surely go to Phila- delphia to row in the American Hol- low Cup race.

Fresh Heavies Meet Groton

Although they have not been very successful, so far this year, the fresh- men crew has been working hard during the past week in order to get in shape for the race this Saturday. The second heaviest and lighter- weights aside for work Harvard a good race. The first freshman heavy, however, will have to run under severe handicaps as they will not only have to row over a very difficult course, but also have to row over a great shell. In spite of this, they have great hopes for a successful day.

The race this Saturday will be the first and only race that the second 150-pound varsity crew will have this year. In spite of the fact that most teams had to be recruited from other crews, they have shipped together, according to Dr. Nelson, and Thomas, an experienced stroke, the boys are out to make a strong bid for a win. Indecisively, Thomas was the stroke of the Sophomore crew which won the Groton cup last Saturday. It was also the stroke of last year's successful Pittsford crew, and the stroke of this year's winning Sopho- more Field Day crew.

UNDERGRADUATE NOTICE

All Freshmen seniors are urged to listen to the radio this week for the "Meet" of the Sophomore crew at Hingham, Thursday, July 25 and continues for six weeks ending on September 3.

---age good grapes to make rare wines

---and they do something like that to mellow good tobaccos

---there are no wines come from the know that the two most important things in wine-making are the selection of the grapes and the long years of aging in the wine cellars.

the making of a cigarette. You have to get the right tobaccos, then put them away to age and mellow in wooden casks.

You can't make a good cigarette like Chesterfield in a day. It takes over two years to age the tobacco for your Chesterfields—but it adds something to the taste and makes them milder.

Everything that modern Science really knows about is used to make Chesterfield the cigarette that's milder, the cigarette that tastes better.
