FRUSTRATE ATTEMPT OF Co-0 to Cause Flood

It’s not often that we’re able to gasp anything definite upon these pages to redress the grievances of the student body, for the monster, in one particular, to go ahead and school building the buildings. Her being perfectly undisturbed and in some instances, literally in the building, when she came up to him and started a conversation. It is, of course, impossible to do this, as we have no information from any source, including the Department of Housing and Education, about the state of the water. The pressure, she said, was the same as on the campus, and that is to anticipate blowing wind for the first time this morning.

The cause was readily interpretable for new one to XV, so as to meet the older one co-ed left the water fountain on and, the old being discharged, had managed to flood the halls in her immediate vicinity.

The moral of this little tale is that we don't speak in co-eds. You can't tell what will happen.

TECH WRESTLERS LOSE TO HARVARD

Vassar, Freshmen Lose To Better Conditioned Harvard

Men: T. Y.'s varsity and freshman grappling forces fared a more experienced and seasoned Middlebury squad on Saturday afternoon, when they lost by a 28-12 score. Although only two teams could be selected, the varsity victor was easily the stronger, with a score of 16-4. Middlebury's best effort came from Howard Miller who defeated W. L. in the 152 lb. class, and 3-2.

Lester Carmanotzak put up one of the strongest efforts of the afternoon when he took on Broadwood in the very heavy weight division. He lost narrowly against him on the small time advantage of 2 1/2. The other feature match was between Don Brown and the Dean, who refers the referee for all to 2-1 in a good show.

Women: The Middlebury field was represented by three, and we had no match yet, added four more victories, making the final score 16-4. The newsletter, which includes a summary of the day's events, is being sent to all interested parties.

The varsity control is the number one team in the entire country, and the Middlebury team, which has lost two of its last three, is up against it. The score here is a 15-4 victory for the Bears.

TECHNOLOGY MARKSMEN SCORE MORE VICTORIES

Continuing their conquering season, the Engineering team which has won four out of six meets, added another to its list of triumphs.

The varsity team, which has been the strongest in the country, defeated the University of St. Louis, 25-10.

The Beaver officers, as always, were on hand for the occasion, and the score was immediately made official by the officials.

HARRIMANTSPEAK AT BUSINESS PARLEY

New Year's Meeting On Urgent Present-Day Problem.

Entitled "To Discuss Question: What Will Happen to Middlebury in the Next Twenty Years?" Such is the purpose of the Business Parley, which will be held at Memorial on Monday, December 31, at 8 p.m. The meeting will be open to the public, and all interested in the future development of the college are invited to attend.

The speakers for the evening will be representatives of the Department of Commerce and Business Administration, who will make a series of authoritative addresses on the subject of business in the next twenty years. The evening will conclude with a joint reception in the Belcher Room.

The speakers for the evening will be representatives of the Department of Commerce and Business Administration, who will make a series of authoritative addresses on the subject of business in the next twenty years. The evening will conclude with a joint reception in the Belcher Room.

Under the direction of Professor R. E. Rogers, the Department of Business Administration will hold a series of urgent present-day problems, to be discussed by business leaders and educators. The meetings will be held in the Belcher Room, and all interested are invited to attend.

BIOLOGY DEPARTMENT FLESHISCHEN YEAST CULTURES Sought at World's Largest Yeast factory

Under the direction of Professor R. E. Dickey of the Biology Department, a group of students from the Department of Biology and Public Health will visit the world's largest yeast factory, the Fleschien Yeast Co. in Pekin, Ill., on Monday, January 1, 1935.

This visit to the largest yeast factory in the world enabled the students to see for themselves what happens behind the scenes before a product reaches the consumer. The tour included all aspects of the factory, from the point of view of both the consumer and the worker. The students were impressed with the efficiency and efficiency of the operation, and the knowledge of the staff.

The students were impressed with the efficiency and efficiency of the operation, and the knowledge of the staff.
