

substitute for waving the outmoded bloody publicity minded politicians who have found to a bomb made up of the colossal losses on the leashed, but it was the shutting off of food of famine and war. Nor did the “intelligensia” the people to violence little the gaunt figures that made the Massachusetts farmers defend of liberty and a desire for just representation for rebellions.

Thus, the Coughlins, the Hearsts, and the rest have driven to abandon hope for a satisfactory life, for unless he has material worthy of his talents, every, a rather difficult task against this form of their time if their only pur-

It was more than an abstract love of liberty and a desire for just representation that made the Massachusetts farmers defend Bunker Hill. The forces that blew out exist- ence of the French monarchy and its appendages have been let loose in an extended period of severe economic and social hardship. No soap box orator, or even a Voltaire, can sway the people to violence like the gaunt figures of fame and even more of the “intelligensia” who built up the Communist party cause the Russian revolution. The intellect have in some measures directed the forces that were un- leashed, but it was the shutting off of food from St. Petersburg that lighted up the face of Russian revolution.

It is only a literary game, of course, to play with this thought, but we are curious to observe that, like an engineer’s stress-strain diagram, there are cause and effect histories for rebellions.

A sound method of discouraging and inviting economic restrictions preceded the American Revolution. It was more than an abstract love of liberty and a desire for just representation that made the Massachusetts farmers defend Bunker Hill.
