Tuesday, February 5
6:30—Reserve Officers' dinner, Faculty Dining Room, Walker Memorial.
6:30—Graduate House dinner, North Hall, Walker Memorial.
7:00—Sponsership Group dinner, Fabry Room, Wave basement.
Thursday, February 7
5:00—Theoretical Seminar, Large Lecture Room, George Eastman Laboratory. "Theories of Magnetism," Prof. J. H. Van Vleck.
6:00—Association of General Contractors' dinner, Grill Room, Walker Memorial.

Research in Cement Furthered by Grant
Institute Receives Thousand Dollars from National Research Council

A grant of $1,000 has been made by the National Research Council to the chemical engineering department of the Institute for use in research on gel structures in cement.

The grant will make possible an investigation in which the microscopic will be used to study the crystallization and hardening, or gelation, of cement as it hardens in the process. The work will be cut out under the direction of Dr. L. E. Towner of the department of chemical engineering, with the cooperation of the department of civil and sanitary engineering.

to solve and that he would be glad to give them to anyone who would like to attempt to solve them. The mathematicians working with equations from biology must have an appreciation of the subject so as not to make unwarranted assumptions, he said.

As professor of genetics at the University of London, and the head of the genetics research at the John Innes Horticultural Institute, Professor Halban has made outstanding contributions in the field of physiological chemistry, genetics, and the mathematical study of natural selection. Haldane said that by his mathematical analysis he has made the terms of the Darwinian theory, such as "adaptation," more exact. He therefore feels that he has strengthened the Darwinian Theory of Evolution.

a background of physical and social sciences sufficient to insure intelligent participation. The course will carry credit toward a degree.

Undergraduate Notice

The T. C. A. Book Exchange announces that there is a great demand for second hand copies of the books listed in the normal Bulletin for the second term. The Exchange offers used books at two thirds original price, with no commission.

College Life (Continued from Page 1)

youth, abets the new mood of violence to Communist propaganda, the collapse of parental authority, post-war psychosis, and prohibition. But just a moment! In workflow, then, a new development of our disintegrating world? Well, if readiness may be defined as sound, green baloney, riding, and hooligan, no just a lot of taters.

In the icy youth of this republic, only the howl of the Jungle ruled, it would seem, in classroom and on campus. Dr. Andrew D. White, President of Cornell University, Ambassador to Germany and Russia, and a famous historian, said "I myself saw at (Robart) College one professor, an excellent orator, driven out of a room through the panel of a door, with books, boots, and spittles thrown at his head, and I saw, more than once, snowballs and bottles hurled at the head of the highly respected president of the college, whom I also saw, at another time, locked in his lecture room and forced to escape from a window by a ladder lowered from the second story."
