Musical Clubs

Eight fraternities have entered in the competition for the cup this year. They will appear in two groups. The first group consisting of Phi Sigma, Sigma Chi, Phi Beta Delta, and Phi Mu Delta, will play from nine to three o'clock with intermissions for the group singing. The second group, Alpha Tau Omega, Sigma Chi, Phi Beta Delta, and Phi Mu Delta, will come on at 9:45. The winners of these two groups will enter the final competition which is to be held at midnight. Following the finals, there will be a novelty act by Theta Delta Chi after which the cup will be presented.

The "claptometer" which is to be used to judge the winning group is an apparatus arranged to integrate the intensity of clapping over a period of 15 to 20 seconds. It will instantly record the total clapping on a large meter which will be so arranged that it can be seen by the entire audience. A lamp near the meter will indicate while the clapping is being recorded. The sound will be transmitted to the apparatus by means of a carbon microphone which will be suspended in mid-air in the center of Walker. This novel apparatus has been conceived and constructed by the "oratorical radio men," A. R. Applegate, '35, Paul St. Regis and his orchestra will play from nine to three o'clock with intermissions for the group singing. The tickets are two dollars per couple and may be obtained at the Main Lobby at which time table reservations may be made, or from any member of the Combined Musical Clubs.

The maestro will be Mrs. Karl T. Compton, Mrs. Leicester F. Hamilton, Mrs. Paul St. Regis, and Mrs. James R. Jack, and Mrs. Ralph V. Jope.

Menorah Society Elects Officers

Leonard A. Seder, '37, was elected president of the Technology chapter of the Interfraternity Menorah Society, at its meeting Friday, February 15. Other officers chosen were Arthur J. Shapiro, '36, Vice-President; Sidney Rosen, '35, Treasurer; Albert A. Wall, '37, Executive Chairman; Hyman Breitman, '37, and Louis Blatt, '36, members of the Executive Board.
