Promotor Hubbard, chemical engineer for the Asphalt Institute of New York, was the guest speaker at the A. S. C. E. dinner meeting held last night in the faculty dining room.

N. Joseph Winiarski presided at the meeting and introduced the speaker of the evening. Mr. Hubbard spoke of "Recent Developments In Flood Control Among Our Neighbors," and illustrated his talk with slides and motion pictures.

Mr. Hubbard spoke of the necessity for the prevention of floods. He discussed the conditions that prevail in our neighboring countries and the methods used to prevent floods. He also discussed the importance of flood control and the need for cooperation between governments and individuals.

Mr. Hubbard also discussed the use of new materials and techniques in flood control, such as the use of concrete and the construction of levees. He also discussed the importance of education and public awareness in flood control.

Mr. Hubbard concluded his talk by emphasizing the need for continued research and innovation in flood control. He encouraged the audience to stay informed and involved in the fight against floods.

Mr. Hubbard's talk was well received by the audience, and the meeting was adjourned.
