Transportation Will Be Offered Students by T.C.A.

T.C.A. students who wish to go home for spring vacations may arrange transportation by the agency "Passenger-Driver" Service of Transportation Corporation. Any T.C.A. student who drives a car and is 21 years old may participate in this service. Names of students who are driving home or who wish to drive their own cars home are on file at the T.C.A. office, and anyone interested in the service may have these names by asking. Those interested are requested to send in or leave their names as soon as possible so that all men may be taken care of.

Freshmen Complete Plans For Dance

Preface Dates Of Light Bow Tie, Hair-Five-Foot-Three; No Red Heads

"Anything but a red head" one student told the freshmen dance committee, in connection with the freshmen dance, which will be held tonight in the Main Hall of Walker. The dance is open to the freshmen only and a large number of tickets are still on sale.

Music for the affair tonight will be furnished by the orchestra under the direction of Jack Franks, and Mrs. Hurd Ross, companion of Mrs. I. Mardell Laze, who became popular recently at a Los Angeles concert as a violinist, will accompany the orchestra. All tickets are now on sale in the freshman dormitory.

As those who have attended previous dances have learned, the music is divided into seven different periods, each with its own conductor.

Miss Travis has been associated with the Economics Department of the Institute, and has been in charge of the economics department board. She is a graduate of the New England business college and has been associated with the Institute for several years. She was graduated from the Institute in 1920 and has been associated with the Institute ever since.

Other Speaker

Dr. Vannevar Bush, Vice-President of the Institute and Dean of Engineering, will be the guest of the Woman's Club for dinner tomorrow night. The dinner will be a reception to 60 outstanding women who have graduated from the Institute and who have contributed to technological development.
