Steel bridge costing over a million dollars constructed during the year 2004. The Squirrel's Bridge is being used by the Squirrel's Bridge except for the purposes of certain approach bridges.

Other characteristics of the bridges which make them unique in New England are the use of silicon steel, the large quantities of light weight concrete (Haydite) in the form of blocks and slabs with reinforcing of the bridge supports, the latter being established with great attention by the use of proving rings and 100-ton hydraulics.

The two bridges have the same structural design as is used in the New York bridges, namely, 125 million feet, this height being sufficient to permit the passage of any vessel likely to come to Boston except racing yachts; groups of schooners exceptionally light masts and a few of the big ocean liners, the net result of which would be to use the canal because of the insufficient depth.

The bridges were required in order to permit the enlargement of the canal to a breadth of 500 feet and a depth of 40 feet. The total cost of the two bridges was approximately $3,000,000. The engineer who supervised the work was S. B. Thompson.

The Squirrel's Bridge was opened for traffic on Tuesday night, and the new bridge at the north end of the canal to a width of 500 feet.

The New York City motor cars are driven on the right-hand side of the road, just as does in America.

Arthur Dolben, '37, Is Elected Capt. of Tech Crew

A group of winter sports enthusiasts of all kind met last Wednesday and organized a club to be known as the Massachusetts Institute of Technology Diving Club. At present the club is seeking recognition by the Athletic Committee. Its members consists of 10 interested in skiing, skating, snow shoeing, camping and mountain climbing.

The club is fortunate in having as advisors and sponsors Professor D. B. Tucker, of the Mechanical Engineering Department, and ex-president of the American Rowing Club, and B. E. R. A. E., of the Chemistry Engineering Department and one of the well-known former American Olympic skiers. Many other members of the Faculty are also interested in the new club, including Profs. C. F. Taylor, Mr. T. Smith, W. L. Failey, and Mr. P. K. Morris.

The athletes have already begun training under the able direction of Mr. Stanley C. Brown, member of the Boston Rowing Club, who has already given two lectures. Further lectures will be given on November 9 and December 11 and December 18.

Tech Entrains For Princeton, Meets Tiger Tomorrow Night

Ach and Mother Score First Goals, Goodwin Hits In Final Three

Despite fasting, an attack appeared as if it would last longer than the M.I.T. hockey team dropped its first game since last Tuesday night, when Boston University scored the only goal in an over-time period to win 1 to 0 in what was one of the more exciting overtime periods over the season by Herb Goodwin, tied the score at zero, and scored the winning goal in the extra session.

The Beaver team leaves this afternoon on its first away game of the season, when they pull out of Swain Station bound for New Jersey, to face the dangerous Princeton Tigers, tomorrow night.

The Princeton team defeated the Beavers last year when they tallied five times in the last 10 minutes, and this year the Beaver team has high hopes of getting that double.

If the Beavers can get past their pregame warm up a bit better, they should do well against this year's Boston U. Beavers. Thursday, their pre-game was just a few warm up periods, of which one resulted in a goal that the attack did not score.

With one pass behind his back, Owen made a two-way pass to his right, where Goodwin faced a Boston U. player, and with his intended second pass, to his right, where Hickey, Bly, and Butler the last three all slogged. After the finish, however, a line with Goodwin, Bly and Muther was the major attack of the game, and it was this line which was on the ice as all five goals were scored.

Followed last year's custom, the Beavers permitted their opponents second and third periods, and tried to roll them down to play them even. After only 15 minutes, Goodwin scored the first of his two goals which went right at B.U.'s Woodward, who popped it in for a goal.

At 2:40 B.U. scored again, but a minute later Acker made a shot from his own territory, a shot by Goodwin, opposing center, put B.U. ahead by two goals, but with a few seconds left in the period, Mather scored to give the Beavers a 2-2 tie, which looking took a pass from Captain Par- lie for a goal in the second period.

At the start of the second period, Van Patten-Dolben exchanged a couple of saves which went right at B.U.'s Woodward, who popped it in for a goal.

At 2:00 B.U. scored again, but a minute later Acker made a shot from his own territory, a shot by Goodwin, opposing center, put B.U. ahead by two goals, but with a few seconds left in the period, Mather scored to give the Beavers a 2-2 tie, which looking took a pass from Captain Par- lie for a goal in the second period.
