IDEAS FOR SALE

ENGINEERS and scientists are usually considered to be a rather capable group of individuals. They have contributed in remarkable degree toward whatever progress humanity has managed to make in the past. But they have also tended toward some degree of aloofness, so that only a few of them have felt the need to concern themselves with the scribbling and publishing of journals.

Evidently, then, there is a market for such books. This is something of an old idea. The Minuteman Press, founded in 1833, is the oldest scientific institution in the United States. It has at various times published a number of books, including some on the history of science. It was one of the first to try to make science more accessible to the general public. The result was the creation of the American Association for the Advancement of Science, which is still active today.

The main idea behind this new venture is to provide information about the latest developments in science and technology in a form that can be easily understood by the general public. This will be done through a series of articles and essays written by leading scientists and engineers. The first issue is scheduled to appear next month.

THE TECHNIQUE BOARD

Debate
The Technological Institute is proud to announce that the United States Senate will not follow through with its threat to suspend the debate on the issue of the future of the Senate. The debate, which took place on Monday evening, was the first step in what is expected to be a long and difficult process. The Senate has been considering this issue for several weeks, and it is clear that there is no easy solution to the problem.

The debate was well attended, with over 100 members of the Senate present. The atmosphere was respectful and constructive, with each side making a strong case for its position. The debate was moderated by Senator Charles V. Chennault, who did an excellent job of keeping the discussion on track. The Senate will now hold further meetings to discuss the issue in more detail.

BATTLESHIP

"Hi, how are you?"
"I'm fine, how about you?"
"I'm fine too, thanks."
"What are you doing today?"
"I'm just hanging out, what about you?"
"I'm going to the library to study for my exams."
"That sounds like a good plan."
"Yeah, I need to catch up on some reading."
"I should probably do that too."
"Yeah, I know."
"Well, have a good day."
"You too."

COCKTAIL

"Hi, how are you?"
"I'm fine, how about you?"
"I'm fine too, thanks."
