**The Tech Inquirers**

*From Page 3*

"Sure, "experience maketh the man" and a date now and then is essential." - Robert J. Brauer, '36, X, 133 Massachusetts Ave.

"Yes, indeed. If we could persuade the right sort of co-ed to attend, it would have a fine moral effect. Tech men are altogether too serious." - Joseph Bryan, '38, X, 149 Shore Drive, Winthrop, in Building 1.

"The Institute is no place for a co-ed. The schedule is too intensive for a full-blooded American girl. Let her go some place where she can go out on a date or two a week without hurting her studies." - Jonathan Brown, '39, X, 133 Massachusetts Ave.

**Tech Show**

(*Continued from Page 1*)

The Tech Show

The Tech Show is now complete and it is not expected that any more important changes will be made. The date of the production has not been set definitely as yet but as in past years the show will take place during Junior Week in March.

Fred A. Prahl, '36, general manager of last year's production and new President of the Masque, Tech Show Honor Society, will assist in the management of the production in an advisory capacity. It is anticipated that the members of the Masque will be able to give the production more support and advice this year than has been possible in the past.

From all indications the coming Tech Show will be more immature than that of last year, particularly since Professor Bill Greene, who was unable to help last year because of an appendicitis attack, is again coaching the production this year.

**Official Bulletin Boards**

Net For Activity Notices

"Activity notices should not be placed on official or departmental bulletin boards", the Walker Memorial Committee ordered yesterday. Since all such notices are destroyed when wrongly placed, publicity committees are advised to confine their advertising to the bulletin boards set aside solely for activities. Since the number of "Activity" bulletin boards is insufficient to give adequate notice of coming events, there is no need of missing the official or departmental bulletin boards.

**GET A LIFT WITH A CAMEL**

**THE TOWERS OF MANHATTAN**

from a new angle—New York’s new Triborough Bridge, which is rapidly being completed. In the foreground: Howard Hougland, McGinley-Marshall engineer, wearing the picturesque engineer’s “hard hat,” a necessary protection on big jobs. "An engineer’s life," he says, "costs for physical strain and energy. When my pay as a low ebb, there’s nothing like a Camel, for a Camel serves away all signs of tiredness. I always get a ‘lift’ with a Camel. I have preferred Camel for years because of their good taste and mildness. They never irritate my throat. That’s one way you can tell Camel's are made from more expensive tobacco."
