would be admitted to these first hand discus-
isions of some of the foremost pub-
lisheE, editors and officiaIs.

One whole term has been assigned and the Union
kept part of its promise. Several "big
men" have been asked for the meetings but
these meetings have not been restricted to
members who hold tickets. Addresses have
been opened to the whole body of students,
that otherwise too small an attendance would
be present to secure their interest. Perhaps the fear was warranted, but it seems
that the future success of Tech Union, one
of the most needed of Technology functions,
depends upon the manner of funds through
added membership fees and greater member-
ship depends principally on the restriction of
certain of the best talks to members as was
promised at the beginning of the year.

If an address by a prominent man were
scheduled and announcement made sufficiently
far in advance, would a large number
students immediately sign up and pay the fee
for the one occasion? The fact that the ball
was started rolling, other prominent speakers
would bring in more members and the main-
tenance of the Union's program on a high
level, would mean that ultimately a majority of
the student body, realizing the value that
could be received by joining, would become
members. There would be no need for any dan-
ger that the speakers were benefiting only a
select minority.

But never will students, outside of a few
of the benefited minded, join Tech Union until
they are assured that they are to receive some-
thing in return. They must be confident and
otherwise there would be stagnation and nul-
ity. The student body will be acting for his
best advantage nor would members of the staff
readily accept the activity if the public benefit
which should be theirs.

It is customary upon the installation of a
new managing board, to assure the readers of
The Tech that their newspaper will do its un-
rivalled job of reporting and accurately the
news of the Institute and that in the editorial columns of our friends, as well as in the
joanitk opinion free from prejudice, bass, and
misunderstanding.

To the first promise we give our con-
idence. We shall make our impossible to do
the best job of news reporting which our amateur experience will allow.

However, we should like to be more frank
concerning our proposed attitude toward edit-
orial comment. Any group of essays or com-
mentators, father themselves when they pre-
sume to express any opinion or even know what
that prevailing sentiment is. Pres-
ajuice, will not cause these essays, or even
most of those phases of society in spite of every human effort to prent. Since college men are far
from superstitious, it is, we believe that they presume to accomplish superhuman feats, with the
promise of The Tech will merely make on
ly human mistakes and the only way to correct
of these evils.

The truth of the situation is that the majority
opinion is of little use even if it can be deter-
mined and accurately reflected. On certain
topics there were there any complaints when sa-
jection is the greatest stimulus toward keen think-
ing and accurate analysis by readers. There-
fore, we do not promise to spoon-feed ideas to
you, but rather your better judgment in our opin-
ion will occasionally be challenged with an
opportunity of which we trust you will disagree.
Upon these occasions and also at times when
you think strongly may be not treated by us
let your sentiments be manifested through Op-
aigns, which we shall be glad to be read and
considered. Consider it a duty and not a privilege
to voice your own ideas on any issue about
which you feel strongly and, in our judgment,
will always be the ideas which agree with you.

Let it be no fault of composition or refection fos-
tered by discussions in The Tech but let the
class have the chance to serve as stimate-
tion of thought and as a means by which we shall
nurture our minds for the methods which are
to come. If, during our arguments, we reach
conclusions, they will be only secondar-
y, the important experience which we have obtained in the process.

FACTS AND OPINIONS
VOLUME LVI.

W H I T T I S T I S T E H I S T O R Y , the new administration of The Tech, The Tech, which is just starting should better serve its read-
ers, with the exception of the introduction of fifty-five similar boards since the founding
of the publication. However, Volume LVI will
mean that men who otherwise there would be stagnation and nul-
ity. The student body will be acting for his
best advantage nor would members of the staff
readily accept the activity if the public benefit
which should be theirs.

The privilege of the city. This is now
because of the failul e
ber's and in lobbies. Pt ivate cal s
