The Tech and Tech Union are prime movers; chances may be dismissed in this contest. By April 16 they will have chosen their representative, who will be a member of the Student Government Board, and will be in charge of the Tech Union's activities for the coming year.

The Tech Union is a powerful force in the university, and its representatives have been successful in the past in maintaining order and in preventing any disturbance of the peace of the campus.

The union, which was formed in 1933, is a group of students who work together to promote the interests of the university and to prevent any disturbance of the peace of the campus.
