Open House

Charles F. Poole, Jr., '36, in charge of Open House, assisted by James F. Foutz, '36; Sebastian G. Martinez, '36; Julius J. Schleifman, '36; Charles E. Evans, '36; William R. Austin, '36; Albert Monchouch, '36; and William R. Burn~i, '36, who are in charge of the various committees.

Tech Show

(Continued from Page 1)

ten, and the fifty or more students participating in the show will follow in preparation for the coming performance. In autumn the show will open at 8:30, and in Northampton it will begin at 8:00 so that the students can return to Boston earlier.

Prices are $1.00 for most of the seats and tickets may be secured from members of the show.

6:00 Foster Key Society Meeting, West Lounge, Walker Memorial.

10:00 Freshman Co~cil Meeting, East Lounge, Walker Memorial.

10:00 Graduates Dinner, North Hall, Walker Memorial.

Thursday, April 16

11:00 Closing Date for Nominations for Class Elections. Elections at 10-100.

11:30 Physics Colloquium, "The Measurement of Flame Temperatures," by Prof. O. R. Blackett, Room 6-120.

1:00 Debating Meeting, West Lounge, Walker Memorial.

1:30 Christian Science Meeting, Room 10-160.

2:00 Physics Colloquium, "The Measurement of Flame Temperatures," by Prof. O. R. Blackett, Room 6-120.

6:00 Debate Meeting, West Lounge, Walker Memorial.

10:00 Science Meeting, Room 6-100.

5:00 Class of 1920 Smoker Meeting, Faculty Dining Room, Walker Memorial.

Eclipse

(Continued from Page 1)

August, 1932, eclipse) as to the relative intensity-effects of ultra-violet rays and high-speed particles from the sun. The eclipse makes separation of these various effects possible because they will occur at different times during the process of the eclipse. The problem is of importance both to the theorist and the practical communications engineers and all radio communications engineers, including those who make continuous measurements of distances beyond the horizon, are interested in the evidence of this eclipse against the earth. The arc of the eclipse is Alaska, a town 60 miles south of Orenburg, on the edge of the Siberian desert. Ak-Saltik is a town of about eight thousand inhabitants, with a hospital, machine shop, and all modern conveniences including electrical power. The astronomers' camp will be located about eight miles east of the town in a corn field. The radio camp will set up its transmitters and recording apparatus in the town. Control measurements for the radio work will start about June 4 and will continue through the eclipse of the sun till July 3rd as to include the eclipse of the moon taking place July 2nd. There is a possibility that the radio group will then travel to northern Siberia to obtain measurements of ionosphere height at a northern latitude.

Soph Dance

(Continued from Page 1)

and the general interest that has been shown in the dance.

As was previously announced, the options will sell for fifty cents. Receipts from these options--including the pay of one dollar to complete the admission price of $1.00--must be turned in before May 5th, or the options will be withdrawn from the roll. Only members are allowed to order options, but anyone who does will be spoken to in the form of a "noted" in the record book. The dorms will be resold.

Sales of options will take place all week. In the Main Lobby, they may be purchased from 12 to 2 o'clock, each day. The members of the committee who aid in the distribution of the options will also be holding in the selling.

The members of this committee are: Don Oldman, '36; Fred Harvey, '36; Lemuel C. Ryder, '36; Robert Mather, '36; Frederick F. Stran- 

ning, '36; John R. Cook, '36; Roland S. French, '36; Hunter H. Bond, '36; L. Elder McIntyre, '36; Howard H. Millet, '36, and Samuel Rudolphsky, '36.

Baseball...it's America's outstanding gift to the world of sports

SENATORS, representatives, statesmen, judges, doctors, lawyers, business men and Jimmy the office boy...they're all out for the opening game.

Thrills never to be forgotten...perhaps a home run...or an electrifying no-hit game...perhaps some callow recruit, unaccustomed to the big time, smashing his way into the hearts of the fans.

Baseball brings pleasure to the millions who watch it, and rewards the stars who play it.

Such popularity must be deserved...

At every game and wherever you go you will find people enjoying Chesterfields.

Why...because Chesterfields are outstanding for the pleasure they give...outstanding for mildness...outstanding for better taste.

And more and more smokers, men and women both, enjoy Chesterfield's pleasing taste and aroma...such popularity must be deserved.
