**HORIZONTAL**

1. Proverbial top of North America.
2. Reverso top of North America.
3. Freshman average.
4. Flushed.
5. What people do to.
6. A dog.
7. Related to a vulture.
8. Real stuff.
9. Idly.
10. Prefix to size.
11. Accident.
14. What a jinx to.
15. First half of H horizontal.
16. First half of H horizontal.
17. Symmetry.
18. Not a Forest state.
20. Medical term.

**VERTICAL**

1. Good stuff.
2. Revered.
3. A three-tool monkey.
4. Revered.
5. The neck.
6. Medical term.
7. Almost unfilled.
8. Real stuff.
10. A dog.
11. Prefix to size.
14. What a jinx to.
15. First half of H horizontal.
16. First half of H horizontal.
17. Symmetry.
18. Not a Forest state.
20. Medical term.

**DICOVER BODY IN MAIN LOBBY**

**DOME SEEN IN CHINA**

Reported missing several years ago following the prophecy of our own Professor Phlank that it was rapidly sinking, and subsequently reported as "found" in China, the Institute's dome is now well on the way back toward its original resting place, the top of Building Ten.

It will be remembered that a year ago the Chinese people were amazed to see the lower rim and finally the whole of the dome appeared in the middle of one of the streets in downtown Tien-Tsin.

For a time, the local government solved the problem of what to do with it by using it as a bowl with which to feed China's teeming millions.

After being used for this very worthwhile purpose for several months, Chinese physicists observed that the dome was beginning to leave them. Investigation showed that the dome had acquired an acceleration equal to f over m, and was returning with increasing rapidity to the region whence it came.

Told of these developments by The Tech, Professor Phlank held out small hope for the dome's staying long with us. saying that it was undoubtedly performing simple harmonic motion, and could be expected to persist in these oscillations until such time as f no longer equalled m. From the way he made this sad announcement it was obvious that he held out no hope for this eventuality.

---

**INSTITUTE Denies EXISTENCE**

Institute workmen this morning removed the body which has been hanging from the candelabra in the Main Lobby for the last two weeks. The object was first discovered by a co-ed who happened to be lying on her back directly beneath it. However, Institute authorities denied its existence, declaring it to be a by-product of the freshman physical lectures and entirely unsubstantial.

Authoritative sources believe that this is the source of the odor which has permeated the corridors for several weeks, and the National Student League is understood to be dropping its suit against Lever Brothers and Swift's, Inc., for "odorifying with malicious intent aforesaid". Those who have viewed it, describe the body as "queer, with different parts much the same". The rope which encircles what the Institute Committee voted at their last meeting to call "the neck", has been traced to the Harvard Cooperative Society where it was used to tie up profits.

---

**DORMITORY MEN ARE SETTING A NEW ALL-TIME PEAK OF BROWN-BAGGING**

A completely new list of comparative ratings has recently been released by the records office hereby nullifying all previous ones this term.

Dormitory men are setting a new all-time peak of brown-bagging while the curve of the fraternity ratings has nearly dropped out of sight.

When asked for his reflections on the matter, last night, Professor Blubber E. Dodgers stated, "While it doesn't really matter how ya guys stand in wid da dean, I still tink da guys from the frats is on da level. Dem da real McCoy."

A reporter of the Daily Tech in an interview with Professor Foreign E. Sueis asked Sueis how he interpreted the marked decline in the general fraternity average and the corresponding rise in the Dormitory average.

"Ta h— I with the general averages. They are irrelevant, immaterial, redundant, inconsequential . . . and don't matter," came Sueis' retort.

Denton W. Cloe, Vice-President of the Institute Committee said to reporters this morning in his Dormitory room, "I think there has been some dirty work going on in the records office. Cloe requested that he not be quoted.

Mr. Joe B. BeGimm, registrar of the Institute, has nothing to say to Cloe's accusations. "This will have to be handled through the News Service," was all that reporters could get from him.

---

**IN5 MAIN LOBBY**

**EXISTENCE**

The object was first discovered by a co-ed who happened to be lying on her back directly beneath it. This was first discovered by a co-ed who happened to be lying on her back directly beneath it. However, Institute authorities denied its existence, declaring it to be a by-product of the freshman physical lectures and entirely unsubstantial.
