Chem Society Holds Annual Banquet; New Officers Introduced

Professor Williams of Met. Dept., Norris of Chem. Dept. Give Short Talks

At the M. I. T. Chemical Society's usual annual meeting last night at the Tech Restaurant, concluding the evening with a short talk by Prof. Williams, who, after five years were introduced and officially installed.

The annual meeting were introduced were; Frank S. Stoephen, '27, President; Ruth de S. Davis, '37, Vice-President; Edward C. Logan, '27, Secretary; Albert F. Burnham, '27, Treasurer; John R. Turner, '37, Manager. The faculty speakers at the banquet were; Prof. Robert D. Williams, the University of Minnesota, and Prof. James F. Norris of the Department of Chemistry.

The faculty speakers at the banquet were; Prof. Robert D. Williams, the University of Minnesota, and Prof. James F. Norris of the Department of Chemistry. Prof. Williams was the first speaker, and gave a few minutes for a newly developed micro-chemical analysis, and was able to detect the presence of copper-beryllium alloy, which, while being very tough and having high ductility, was very hard to detect.

The most important property of not disturbing sparks when used in high-pressure work, makes this one of the best miniaturized, in fact a job of maintaining his position. He pointed out the advantages of being a member in dealing with their employers.

Several Tech Men Will Be Chosen To Sail Aboard Weetamoe This Summer

An opportunity to sail as members of the crew of the Class J yacht Weetamoe, offered Summer's cruise, has been made to several members of the class. Reports said that the crew of the Class J yacht Weetamoe in the summer will be composed of twelve professional sailors. Students accepted for the places would receive two pairs of amateur clothes, which would be expected to supply themselves with two pairs of "(Continued on Page 4)
