Mathematical Calculating Machines From 7th Century On Now In Library

Vertically interpreting the Chinese Ghi- ke lecture given by Dean Vasnevar Bush of the Institute of Technology (Tech-

ical Analysis), the exhibition now on ex-
day in the Main Library tells of the development of arithmetical machines of modern com-

puter age (1882) and Scheutz (1853), to first stage of the historical development follows 

Napier's rods (1617), the adding machine of the 17th century, or earlier, the first stage of the historical development follows

Prominent in Class Activities

William Forbes Shuttleworth, TV, 26, died of pneumonia at the infirmary on Sunday afternoon. Promin-
tent in undergraduate affairs since his election, Shuttleworth was elec-
ted vice-president of next year's Jun-
tion for me. I was shown through 

President Compton to Speak At Main Conference In Ohio

Charles F. Kettering, President Of M.I.T., To Speak Also

President Compton has accepted an invitation to be a guest speaker at a two-day educational conference to be held at Ohio State University during the last week of this month. The conference is under the auspices of the Ohio Education Association and the Ohio State University. Many of the topics to be discussed concern educational matters of general interest, while others are of more local or regional significance. The conference is expected to attract a large number of educators from Ohio and neighboring states.

Compton, who is a native of Ohio, has been active in educational affairs throughout his career. He served as president of the Ohio Education Association and was a member of the Ohio State University Board of Trustees. His contributions to education have been recognized with numerous awards and honors, including the Ohio State University Distinguished Service Award and the Ohio State University University Distinguished Service Award.

Compton's speech will focus on issues related to higher education and the role of educators in shaping the future of society. He is expected to address the importance of collaboration between educators and policymakers in addressing contemporary challenges such as access to education, affordability, and the impact of technology on learning.

In addition to Compton's speech, the conference will feature a variety of other sessions and discussions. Attendees will have the opportunity to engage with experts from various fields, including education, business, and government. The conference is open to educators and professionals interested in exploring new ideas and strategies to improve education.

The conference is scheduled to take place from June 1 to June 3, with sessions running from 8:30am to 5:00pm each day. Attendees are encouraged to register early to secure their spots, as seating is limited. For more information, please visit the conference website or contact the organizers directly.
