Professor Turner Declares Japanese And Chinese Are Equals Of Westerners

"I believe that the Oriental peoples, especially the Japanese, are equal in or morally as well as mentally to all the Westerners," said Professor Turner, of the Institute's Biology Department. Professor Turner is a well-known authority on the study of the habits of the Japanese. He has been working at the problem of the relationship of the Japanese to the Chinese for several years. He has concluded that the Japanese and the Chinese are, to all intents and purposes, the same race.

Professor Turner, who is a research professor at the institute, received his Ph.D. degree in zoology from the University of Tokyo. He has been involved in research in Japan for several years.

In Europe, he found that the Japanese and the Chinese are so similar in their habits and customs that they are practically the same race.
