In his second year at Technology, head Coach of Gymnastics Herbert G. Forsell looks forward to making a coach at MIT and operating as such. He is tall, dark-haired and quiet, he gives almost the impression of a Wall Street banker. But Forsell is very cheerful, and always has a good word for accomplishments of his gymnasts. "It's been a most interesting year," he said, "but I can't paint, and I don't draw." In regard to his position at Technology, Forsell is optimistic. "I'm not too old, my boy," he said. "I'm a little rusty, but I still don't paint, and I don't draw."

This year, Forsell reported, the team ought to beat Princeton, Springfield and Harvard. He cites Temple of the New England Gymnastic League as the team to watch. The team is young, he points out, and as such they have a lot of room for improvement. The freshman team under Coach Forsell has made phenomenal progress. When he arrived at Technology, the team was in disarray; the team was nowhere, the team was in the doldrums. After a year with Forsell, the team has risen to the top of the New England gymnastic league.

One of the team's biggest advantages is the presence of immigrant athletes who were not able to attend other colleges. These athletes have a strong desire to excel and a strong work ethic. Forsell believes that these qualities will help the team to succeed. The team is also benefitting from the presence of a strong coaching staff, which is committed to developing the team's potential.

This year, gymnastics has grown suddenly popular. Many of the varsity candidates are men who had never had any previous experience, and some who had. The team is made up of a diverse group of students who come from different backgrounds. This diversity is a strength, as it brings a variety of perspectives to the team. The team is also benefitting from the presence of a strong coaching staff, which is committed to developing the team's potential.

The team has a number of impressive athletes, including seniors who have been on the team for three years. These athletes are working hard to improve their skills and to help the team to succeed. The team is also benefitting from the presence of a strong coaching staff, which is committed to developing the team's potential.

The team's success will be determined by the ability of the athletes to work together and to develop the skills necessary to succeed. The team is committed to working hard, and to improving its skills. The team's success will be determined by the ability of the athletes to work together and to develop the skills necessary to succeed. The team is committed to working hard, and to improving its skills.

In conclusion, the team is in a strong position to succeed. The team has a strong coaching staff, a diverse group of athletes, and a strong work ethic. The team is committed to working hard, and to improving its skills. The team's success will be determined by the ability of the athletes to work together and to develop the skills necessary to succeed. The team is committed to working hard, and to improving its skills.

First Varsity Rifle Match Comes Tonight
Season Opens As YD's Meet Tech Sharpshooters

The varsity rifle team holds its first shoot of the year this evening, when it meets the team of the Yale Gun Club in a six-shooter-to-shooter match at the Technology range.

The M. I. T. is given a slight edge on the match because of the fact that they are familiar with the range while the Y. C. C. is not.

The varsity men who will compete in the match are: Joseph F. Keilty, '37, captain; Francis T. Clough, '38, assistant manager; Thomas E. Kinsella, '37; David S. Newell, Jr., '38, in charge of the range, Berton P. Poole, '38, Charles Main, '37, John L. Olson, '39, Bertram R. Harman, '39, Edward C. Peterson, '37, Edward R. Myrick, '38, alternates, Robert L. Lovett, Jr., '39, and Robert H. Thompson, '39.

Of these, Keilty, Kinsella, Peterson, Whitaker, Clough, Myrick, and Poole are letter men, and of the eight from last year's freshman team to report for varsity, Olson has made the best record. Last year's team broke even with a record of eight wins and eight losses, and won the beating trophy and the New England Rifle League match.

This year there is more promise of a winning year, because of the large number of letter men on the squad.

Varsity Rifle Team Schedule
POSTMATCH MATCHES
Nov. 5 Washington U. New England Rifle League match. Jan. 11 Corps Area ROTC. Starting time for Nov. 5 match to be decided.
