HIDE AND SEEK
ON OPEN HOUSE

The Combined Professional Societies’ vote opposing Open House, completely reversing its earlier position, brings partially into open view the reasons for opposition of voted to as 1973 Open House. It is apparent that there is little enthusiasm for Open House this year among both students and faculty.

Most of us have the impression that the actual work seems to feel that the results are hardly worth the effort. Although the O. C. foreman is not far away, we are not sure how to change his mind. It is not true that all has to do is to learn to work is to be normally industrious. It is not the job of society to the country in which we claim the protection.

Evening, I was brought to the Army and as proof of that fact as I am of my citizenship, it is impossible to be not a pacifist. Lastly, I hope, and I am sure many of my classmates do, to be able to leave this Institute in 1989 with a diploma and a commission.

Sincerely,
D. M. Cole, Jr., ’80

ATTENTION TO DETAILS

WITH this issue of The Tech, the Managing and Associate Boards of Volume LVII, take their rightful places on the campus and hand on the responsibility of management and editorship to the incoming boards.

As we look back upon the last three and a half years on Volume LVII, it is with great pride that we contemplate the last year, there are many news events which pass in review through our minds. Yet, the news highlights in themselves have had small significance than the memorable occasions, acquiring of new friends, and the enjoyable times which accompany the gathering, reporting, and comment upon this news. At the same time we have attempted to be fair to others, or at least, to try to get along with them, occasions, and maintain level heads through-out. Whatever we have failed in these it is not the fault of the board; the mistakes we have made will not only aid us in the future but will guide the destiny of The Tech as the new editors come and go.

At least we have come to one conclusion during our stay with the paper, and that is in respect to the editorial position of a col-

OPEN FORUM

Greetings, The Tech:

As a member of the class of 1940, I am vitally interested in the discussion going about the Institute concerning Membership. I feel that this is probably given more prominence than it should be.

On a trip to the north, I was impressed with the large number of students and faculty who are members of the society. It is my understanding that the system is working well.

In spite of the ridicule to which Mr. Trayler was subjected, I am thoroughly impressed with the results. The system has been very helpful to me as a student, particularly in my course work.

I am well aware of the criticism that has been made of the system, but I am certain that it will continue to be used as an important tool in the teaching process.

Sincerely yours,

Herbert K. Weiss, ’37

A.S.M.E. Plans Drive For Added Members

An intensive drive for new members will be conducted by the A. S. M. E. during the first week of the new term. Beginning Tuesday, February 5, and continuing through Friday, February 8, the Tech will feature A.S.M.E. notices of opportunity to display the brand-name engineering ability of the nation's outstanding engineering students and the opportunity to enlist the support of the entire student body in the national drive.

Two Engineering Men Honored By Society

Two Engineering Men, Peter L. Belavich, ’37, and Eugene W. Bosch, a member of the faculty, have been selected as two of the nation's outstanding electrical engineers. Mr. Belavich was selected as the nation's outstanding electrical engineer of the Westinghouse Electric and Manufacturing Company, while Mr. Bosch was selected as the nation's outstanding electrical engineer of the General Electric Company.

Belavich, who is at present section engineer in charge of transmission engineering for the Westinghouse Electric and Manufacturing Company, is well known for his work on substations and on transmission lines. He is well acquainted with the principles and practices of electrical transmission and distribution, and has made many contributions to the field of electrical engineering.

Bosch, who is at present section engineer in charge of transmission engineering for the General Electric Company, is well known for his work on the design and construction of electrical machinery.

A.S.M.E. plans to add 50 new members to the Institute of Technology this year, and the Tech will feature A.S.M.E. notices of opportunity to display the brand-name engineering ability of the nation's outstanding engineering students and the opportunity to enlist the support of the entire student body in the national drive.

A.S.M.E. plans to add 50 new members to the Institute of Technology this year, and the Tech will feature A.S.M.E. notices of opportunity to display the brand-name engineering ability of the nation's outstanding engineering students and the opportunity to enlist the support of the entire student body in the national drive.

A.S.M.E. plans to add 50 new members to the Institute of Technology this year, and the Tech will feature A.S.M.E. notices of opportunity to display the brand-name engineering ability of the nation's outstanding engineering students and the opportunity to enlist the support of the entire student body in the national drive.
