Institute Instructor Receives Fellowship

Bernard S. Gould, Instructor in Biology at Technology, has been awarded a fellowship by the Committee for Relief of the Belgium Educational Foundation, in recognition of his work for advanced study in Belgium to members of the faculties of American colleges and universities.

Mr. Gould, who took his B.S. at Technology in 1912 and his Ph.D. at the University of London in 1934, will study Microbiology in Belgium. This is the seventeenth year that similar fellowships have been given between the United States and Belgium.

LOUGER

(Continued from Page 2)

straight piece of wire. The time keeper looked at his watch, and wrote down “30” being nine minutes for the round.

The participants then swapped jobs and the timer took only 5 seconds to time them as they slammed the clip, and so on, until the paper clip divided into component parts or the period came to an end. “Ingenious,” said the group admiringly. “And something you can’t afford to be shoved around by the mad.

I: an insignificant sheet (we’re just der “how come” the spread for such a light smoke). The dance was sponsored by The Simmons News, which made us wonder why the “what Tech is” was putting on the dance anyway. We reflected about the number of boys from across the river who were in attendance as we were idling verbally with one of the Deans. Said she, “Oh yes, Tech boys are very popular with Simmonites.” In there you are fellows, — when in double, try Simmonites; you can’t lose.

Undergraduate Notice

The T. C. A. Boys’ Work Department is in quest of those interested in photography to teach a class of boys. Subjects treated will include development, printing, etc. All expenses will be paid by the T. C. A.

Anyone interested may interview Miss Dorothy Wallace Ross in the T. C. A. Office.

Institute Dome Like One On Roman Temple

The dome over the center of Building ten, the unifying symbol of Techology, is in a replica half-scale of the great dome of the Roman Pantheon, which the Emperor Hadrian who reigned from 117 to 138 A. D. erected as a temple to all the gods.

For thirteen centuries the Pantheon served as a Christian church. In recent years it has been used as a burial place for famous Italians.

The lower part of the dome is built up of steps of stone and the upper part is constructed in the form of a spherical filigree. At the very top of the sphere, 141 feet above the floor of the auditorium, is an opening in the stonework, allowing light and air and wind and rain in intermittently to the hall.

The auditorium is itself 325 feet in diameter. Builders of the dome at the Institute followed the general design and proportions of the Pantheon, but made it only half size. On the inside the dome is expected to receive Car-

Carole Lombard says:

“Advised by my singing coach, I changed to Luckies”

In my new picture ‘Swing High, Swing Low’ I sing for the first time since I have been on the screen. To do this, I spent months taking singing lessons. And with this added strain, my voice wasn’t as good in shape. My ring coach, said that when choosing cigarettes, I select a light smoke. And so I changed to Luckies. Since then I’ve found that a light smoke and that throat get along together just fine.”

Monday, March 9

6.30 P.M.—Number Ten Club Meeting—Prakash Room.

League

(Continued From Page 1)

Among the many delegations this year will be that representing the British Empire from Ambersham, France from Wallenker, Bibli- dics, and India from India, and others. The cheerdar Harvard delegation will rep- resent Poland. Radcliffe will represent Canada, Britain, and Persia.

The morning of the first day will be filled with the registration of the dele- gates, an address of welcome by President Constable of Radcliffe, and in the afternoon the various topics on the agenda will be discussed by the six committees corresponding to those of the actual League. In the evening there will be further committee discus- sions. The second day the work will be summarized and a tea dance, given by Radcliffe will be the event of the evening.

The committee discussions this year will include: Reform of the Covenant, International Opium Con- vention, Intellectual Co-operation, Elimination of Trade Barriers, Co- operation and international finance, and Non-intervention and the application of the covenant to particular cases—especially Spain.
