Colloquium On Radio Takes Place Monday

Leslie F. Curtis Will Speak On Design of Radios

A colloquium on "Problems in Radio Receiving Set Design," to be led by Martin, Chief Engineer of the United American Bosch Corporation, is announced by the Electrical Engineering department for next Monday and Tuesday, April 12 and 13. The Colloquium will be held from 2 to 4 o'clock in Room 10-187 on both of these days.

The agenda for the colloquium includes reviews of receiver characteristics, common faults in receivers, typical "all-wave" superheterodynes, and development of a typical receiver. The analysis of certain special problems will also be discussed.

The colloquium is open to seniors, graduate students, junior honor students, members of the staff of the Department of Electrical Engineering, and any others with a serious interest in the subjects.

Peace Conference

(Continued from Page 1)

Peace was initiated by the A. U. C. some weeks ago, at which time it was planned to have a group consisting of members from any and all organizations in the Institute who wished to meet and form plans for a conference to discuss the question of world problems. President Compton gave his approval to this plan. The conference is to be held here at the Institute, as a similar one was held last year during the hour in which the Peace Conference was held, and it is hoped that such action will be taken by the Institute for this year's Conference.

The Conference will be attended by representatives from the A. U. C., the League of Nations Society, the American Legion, the Veterans of Foreign Wars, and the A. U. C. President Compton headed the list of speakers. It was a conference with the stated purpose of presenting the viewpoints of pacifists, defensists, scientists, satirists, and militarists on solving the problem of war. The exact purpose of this year's conference has not been announced but it is assumed that it will be much the same as that of last year.

The Institute suspended all classes last year during the hour in which the Peace Conference was held, and it is hoped that such action will be taken by the Institute for this year's Conference.

TRCH PHARMACY

You CAN'T CHEW ON THE MOUTHPIECE

Wax demonstrates that plants require the same kind of food that we do. By the time the student is ready to take the National Board Examination, he should have formed good habits in the use of this product. The use of a mouthwash such as "Bamber's" will not only prevent cavities and tooth decay, but will also prevent the growth of bacteria in the mouth. The student will benefit greatly by forming the habit of using this product daily.

Visit your local tooth powder dealer.

If you have a mouthwash preference, get Bamber's. Because it is mild, it is effective. Ingredients are harmless. It is readily available at all drug stores.
