Yale Team Beats Tech At "Job Interviews"

Ridge Tech Students Apply To Teams for "Jobs"

Suppose you are an office boy in the estimating department of a manufacturing concern. All your superior are out and a customer calls up for an estimate in a hurry. What would you do?

Young Edward R. Donnelly, a Senior at Ridge Tech, had that question put to him yesterday in applying for a "job" to the two Technology men who represented the Institute's Humanities students in a novel contest with Yale yesterday afternoon.

The competition was the second of its kind ever to be held. In a similar "Job Interview" meeting last year in New Haven, the Institute team defeated Yale. The competitions are designed to see how well Humanities students can apply what they have learned in their classes.

The Yale team, represented by Penny A. Brown, a Science from Texas, and Waldo Shaw, a graduate student from Kansas, "interviewed" Neil D. Cogan, also a Senior at Ridge Tech, and decided to give him a position in the machine shop of the "Elu Rogers Company, Inc.," which the Yale students were supposed to represent. The Technology team consisted of Frank E. Jackson '37, and Jerome E. Sloter '37.

The decision was made by Harold E. Richmond, treasurer of the General Radio Company of Cambridge, who acted in the double capacity of judge and critic.

T.C.A. Represented By Wright At Conference

David A. Wright, '38 president of the T.C.A., will represent Technology at a conference of presidents of college Christian associations of New England to be held in New York City.

The group will travel to Providence where they will board the boat for New York. The first meeting will be held while enroute. Dr. Henry Van Duren will hold the Saturday morning session at the Union Theological Seminary. The remainder of the day will be spent in cutting social centers in the city and in the evening the group will sail back to Providence to conclude the conference at Brown University Sunday.

The purpose of the conference is to enable the members to exchange ideas with each other and thereby improve their respect and organizations.

Colonel Stahle (Continued from Page 1)

Iron is also encouraging to present way leveling. Colonel Stable claims.

"This promising brings back to the people who start it," he maintains.

Served in France

Colonel Stahle, who recently succeeded Samuel C. Veatol as instructor of the R. O. T. C. at Technology, was born in Pennsylvania and graduated from Pennsylvania State University where he studied Civil Engineering and compulsory military training. After graduation in 1911 he worked as draftsman in West Virginia, soon afterward accepting an appointment in the Cavalry Artillery service. In 1915 he was transferred to the Philippines Islands from where he was called to France at the entrance of the United States into the World War.

After the Armistice, Colonel Stahle went to the Pacific Coast, received a Master's Degree at the Institute in 1922, and served at Fort Leavenworth and Michigan State University.

Colonel Stable is married and has two children—a boy who graduated from Michigan State University and a girl, Mary Jane, a Junior at Pennsylvania State.

Photography is a Hobby

Jokingly admitting that photography is not a safe hobby for a soldier, Colonel Stable says, "It is a hobby; it is set in the new art. He keeps up with the latest developments in this field and has taken colored photographs of the Philippines which he returned to visit recently.

In addition to his interest in photography, the Colonel has collected a large variety of Philippine coins—currency, weapons, and woven goods.

See Faculty of World War

During his experience as a soldier, Colonel Stahle has encountered all aspects of war. Although he admits that the World War did accomplish the "making of democracy," he maintains his belief in the uprightness of the people who fought for the ideal.

"I fear very strongly," he declared, "that wars are not yet outlawed and that there will be many other wars in the years to come."

Mount Vernon Church Society Holds Dance

The Young People's Society of the Mount Vernon Church will hold a victrola dance in the North Hall of Walker tonight at 8:30. The affair will last until one A.M.; admission is twenty-five cents. Recordings by Benny Goodman, Ozzie Nelson, Tommy Dorsey, and other well known orchestra leaders are to be featured.

The dance will be preceded by a dinner at which the Young Vernon Society will host to two other church groups.

BASEBALL'S "IRON-MAN!" When Lou steps on the field, for his first game of the 1937 season—will he be playing his 1,500th consecutive game? Injuries never stopped Gehrig. Once he injured his foot, he knocked one horse down, and pushed the other one back. This Gehrig record is proof of his splendid physical condition. As Lou says: "I've been careful about my physical condition, but Gehrig is Camels."

HOME RUN KINGS! Gehrig (a regular Camel smoker) has an iron-gray mustache. In his 1937 season, Gehrig blistered a home run record, blasted 44 home runs, scored in 110 consecutive games, and was voted the American League's home run king. Gehrig’s hits per season: 1934, 221; 1935, 205; 1936, 201; 1937, 215. Gehrig’s hits in 1937: 215. Gehrig’s home run record is 44. Gehrig’s batting average for the first half of the season was only 6/106ths short of PERFECT.

HIT'S 1920'S 1930'S, A REAL SLUGGER...

HERE'S LOU'S FAVORITE BAT and his favorite five-base hit record. His hits are specially made. He went out two miles a season. Last year, with a .377 average, his first home run at the first base was only 6/106ths short of PERFECT.

THE TECH Record Number Visit Tech During Vacation

Under the sponsorship of the Greater Boston Federation, 389 boys and girls from Western Massachusetts, a record number, recently visited the Institute on a tour of inspection. This is the latest of a series of large groups of children to visit the Institute during the spring season.

The party bunched at Walker Memorial, and then saw sizzling pictures of Tech students. Afterwards they had a group picture taken of them on their way to Walker. The only expense that the pupils incurred were for the trip to Technology and the use in Walker.

The First Church of Christ, Scientist

Pulaski, Maryland, and the First Church of Christ, Scientist, North East, Maryland, are having their annual summer camp for children this week. The camp is being held at the Union School, North East, for the first time since 1933. The camp is sponsored by the Great Mountains Christian Science Association of Maryland, and is attended by children of all ages.

Camp advisors are Misses. Grace Wikimedia, a member of the church and a writer of the church, and Miss Mary Madison, a member of the church and a teacher of the church. Misses. Wikimedia and Madison are both experienced camp advisors.

The camp is open to all children, of all ages, and is attended by children of all ages. The camp is sponsored by the Great Mountains Christian Science Association of Maryland, and is attended by children of all ages.
