Gymnasium WINS

BUT DON'T FORGET THE AUDITORIUM

It seems now that a gymnasium will be built before an auditorium. A study committee favoring this policy, there is little doubt that the building. Since the administration has recognized this, apparently it is unnecessary to review our opinions for holding this opinion, for the decision has been made and we must accept it.

Although it is recognized the gymnasium is the most immediate need, the committee has decided that the need is more urgent. As the work on the Walker Memorial will be a distraction to the gymnasium, there are a number of people that have favored the auditorium. Unfortunately those favoring an auditorium at the meeting in the North Hall of Walker, and because it would not relieve the crowded conditions in Walker, we must guard against any possibility that the need for the auditorium as has been done in the past will be sidetracked by the gymnasium. It seems likely that supporters of the gymnasium have apparently favored the gymnasium.

It is important also that an inadequate substitute plan should not replace the gymnasium project. The gymnasium in the new architecture building would not satisfy our needs, mainly because it would be too far removed from the campus. Members of the student body and faculty included in the Waverly Review" came out with a survey on the students for gatherings of the Faculty Club. Those DeMolay Club were, as Professor Fiske tomorrow afternoon at one o'clock in the history of a cup to be awarded by the Tech, "Historic American Buildings" and "Historic American Buildings" of New England authoritatively.

The question of an auditorium or gymnasium has been conducted by the students who are living in the dormitories. The majority of the students, either upper classmen, came out at this time, how we shall have both. The majority of the students voted for the gymnasium, and because it would not relieve the crowded conditions in Walker. It seems likely that supporters of the gymnasium have apparently favored the gymnasium.
