Wednesday the freshman track team won their second win for the frosh in the three meets this year, by a score of 69 to 39. This was the first time that the team had defeated Governor Dummer Academy, the team's arch-rivals. The meet was held on Mt. I. T. Field.

In their last meet of the year on Monday, May 24, the team showed great improvement. John S. Hamner,aton, '38, won the long jump; Josephine Overton, '37, one mile championship, in the two mile race; John S. Hamner, '38, in the 440 yard run; Eugene P. M. Hill, '39, in the sprints; Nestor Saba, '37, in the marathon; and Lenore Kight Wingard, '36, in the triple jump. In the shot put, '38, in the pole vault. The team is looking forward to a larger program next year.

The important point that one can clearly bring out by Professor Burdell's account is that, while decent housing for the 60 percent of the American families whose incomes are less than $2000, will not entirely eliminate these problems, at least this step will produce an adequate physical framework for the shelter of the family and permit a degree of privacy, convenience and recreation space indispensable to the American standard of living.

The federal housing program will prove inadequate. In fact, a recent survey made by Howard Whipple Green, '14, of a 500 acre tract in the heart of the city of Cleveland revealed that 1500, 6.7 percent of the city, and 2.2 percent of its population produced 21 percent of the murders, 86 percent of the prostitution, 10 percent of the illegitimate births, and 12 percent of the deaths from tuberculosis.

Professor Burdell concludes that, while decent housing for the 60 percent of the American families whose incomes are less than $2000, will not entirely eliminate these problems, at least this step will produce an adequate physical framework for the shelter of the family and permit a degree of privacy, convenience and recreation space indispensable to the American standard of living.

dated for from Governor E. Corbin, '38. In the sprint, Norton Hall, '37, in the 440 yard dash; Emery P. Cournoyer, '37, in the mile; Captain Hetty R. Gascelle, '37, and holder of the mile mile championship, in the two mile run; Albert C. Paars, Jr., '37, in the low hurdles; Thomas R. Kurnade, '37, in the hammer throw; John S. Hamilton, '38, in the high jump; and Llew L. Ellis, '37, in the pole vault.

In their last meet of the year on Wednesday, the freshmen track team defeated Governor Dummer Academy by a score of 69 to 39. This was the second win for the frosh in the three dual meets this year.

In the twenty-two cents per student allowed from the nation, was given to the Tech Open Forum on which to operate next year.

Dues will be abolished and the meetings open to the entire student body. The contingency fund, which has been accumulated and invested over a period of years, was this year used to finance the Musical Clubs. It is approved a petition by the Musical Club that it receive corporation funding. This, if passed, will enable them to secure adequate coaching and a larger program next year.

A. A.

The importent point that one can clearly bring out by Professor Burdell's account is that, while decent housing for the 60 percent of the American families whose incomes are less than $2000, will not entirely eliminate these problems, at least this step will produce an adequate physical framework for the shelter of the family and permit a degree of privacy, convenience and recreation space indispensable to the American standard of living.
