Field Day Points Remain Unchanged

Scoring System Will Be Same
In Marking Games of Last Year

That there will be no revision in the scoring of the Field Day events this year was announced yesterday by Stuart Palaf, '35, manager of the A.S.W.E. Committee.

Four points will be awarded for first place in each event, two for second place, one for third, and no points for fourth. The points are to be used in the event of the tie rule, which states that if there is any tie, the event is to be rerun.

In the event of a cut off, the last three in each event will be given no points. Any other exceptions will be noted.

In the case of Field Day meets and contests, the following guidelines for the determination of eligibility will be used:

1. The contest must be open to the general public.
2. The contest must be conducted according to the rules of the A.S.W.E.
3. The contest must be conducted in a safe manner.
4. The contest must be conducted in a fair manner.

In the case of any questions regarding eligibility, the rules committee will make the final decision.

In addition, the A.S.W.E. Committee will conduct a survey to determine the interest of the student body in various activities. The results of the survey will be used to determine the activities that will be included in the Field Day program.

In conclusion, the A.S.W.E. Committee is committed to providing a safe, fair, and enjoyable Field Day for all participants. The committee will work to ensure that the Field Day program meets these goals.

M. T. Radio Society Boasts Forty Members

H. G. Gray, Australian Amateur

The M. T. Radio Society today celebrated its forty-first birthday by holding a special meeting in the North Hall of Walker Memorial. The meeting was attended by forty members of the society, including many alumni.

The society was founded in 1906 by H. G. Gray, an Australian amateur, and has been in continuous operation since that time. The society currently has forty members, including many alumni.

The society meets on the first Thursday of each month, and is open to all students, faculty, and alumni who are interested in radio and electronic engineering.

In conclusion, the M. T. Radio Society is a vibrant and active society, and continues to be a leader in the field of radio and electronic engineering.
